

Assumptions about human brain powers(1) and properties of water ripples or water(2).

Subtitle(1) :- Extra Powers of Human Mind or Human Brain or Human.

Kshitij Sudhakar Wasnik

Brijlal biyani science college, Amravati, Maharashtra, India

Keywords: - Human brains powers by synching, means brain to brain synching may be by emitting some wave or particles.

ABSTRACT: -

In this assumption paper working of human mind are given means what human mind can do to others with only mind nothing other than that, like synching with one mind to other may be by emitting EM wave or other wave or particle is given :-

Introduction

In today's world neuro science is getting advanced. Somewhere we are hearing brain hacking and somewhere we are hearing that any person known exact that what is going on other persons mind or his information like that any person see any illusions sometimes but he thinks that how it happens. Sometimes any person or I also thought of any presentation and my mind or brain showed me that how it would be. In news channels or any channels comes that any person watched any soul or sometimes it can be disorder/mental diseases. But in this research paper/assumption paper the extra powers of brains or concept of extra powers of brains are described.

Concept of extra powers of brains.

From human history to now many sayings are and some call it as superstitions. Like or mainly about Gods or any Saints or humans also that they are tricky, magical or miracles. But if we go through science eye some are scientific things. Extra powers of humans brain describes that or this paper describes that some things which human thinks that they are magic or his any disease or his any mental/health defect, it is or it would be/could be by this powers, means someone other is doing this or his own brain wants to tell him. May be his brain or whole body wants tell him. It would modify human. As well as it can modify human species or whole living things.

Business analytical

In today's world's education new and modern as well as the topics which will modifies humans are the most required topics are required. As well as in laboratories the topics which will modifies human and the most required. So this paper can be published in many syllabus books as well as in many science books and can give a different thinking to human. As well as this can give a different thinking to legal system, defence system, privacy of persons and daily life of persons and can give a different way to live. After a perfect methods these can be laws like laws of motions.

Main paper(1)

To or on others :-

- Can insert feelings.
- Can show illusions or pics.
- Can talk without mouth or any other protocol like sign language, only with mind.
- Can sense surrounding things.
- Some physical effects or environmental effects mind can do (can be for attacking or can be for defence).

- Can communicate through internet or telephone or any machine suitable without any guessing or assumption
- (Aliens and man communication protocol can be with human mind only but if human can do this through network or any machine like satellite, or any Suitable).
- *Can forget someone by inserting or doing something in his mind with only with our mind or any our part. But works doing on others if their mind or their (means unnamed power described in paper we can name it also like we call burning process as 'burning')will not oppose.

To ourself with our mind or our mind do sometimes :-

- *Can show images or any illusion to ourself.
- *Can speak or it can hear us.
- Can create auto talking or with images and feeling and sensations Like autopresentations.
- Can move any body parts like artificially moving.
- Can change inner situations like temperature and can change metal state.

Applications of assumptions :-

These assumptions can for all human species and are by synching (means like one mobiles connect by emitting radiation or em wave, we can say may be brain or human body but mainly human brain emit waves for doing these) :-

*By illusions: -

Man can show illusions for misguiding others watch on us Or

If any criminal's watch on us then we will escape from him by showing any illusion like we as any other person's image or changing surrounding scene and showing other scene.

In defence means military, the military man can show him at slightly distant place for misguide or for missing his target from him(the military man who is showing illusion) of his enemy.

Like that through machine means through mobile phone or any communication device if this effect can possible through that, then he can misguide him even if he is out of his range of synching of his brain and others brain.

As well as any person can show him as a bigger than his original size and he can show any animal to other especially any predator for scaring him and any non predator for some other person for calling him closer as a trap.

And any person who is unknown from all species or thing in the world then any other person can show any imaginary thing or species which does not exist in this world and for believing in it (for believing in it he will change his mental state, mental state or feeling like original effect which will be described in the effects - changing mental state or inserting feeling.) And illusion of invisible or making us invisible by combinations of all surrounding around us.

Like that at many places he can show illusions They are described below :-

At or on road any illusionary vehicle, at Sky any illusionary vehicle, while typing or on screen other words, somewhere illusionary fire is or somewhere is illusionary snow or Any weird effects like comic effects like car is flying or any dog is flying blah blah blah.....

*By inserting feeling :-

By this effect any person can insert feeling of happiness, sadness, fear, or feelings like disgusting, anger sometimes excitement, amazing, attraction.

Sometimes or upper described feelings with humans senses hand, legs, eyes, ears etc.

or combinations of then. And feelings like seducing or depression.

And inserting or by inserting forgetting anything from brain of the person.

Feelings or emotions teasing others or hitting other person or temperature of other person or inserting that his one part or any body sense is paralyzed or diffusing him means making him unconscious. Or many feelings or sentiments and combinations of them or which will discovered in future by any medicines or drugs.

*Can talk without mouth or any protocol like sign language by senses only by mind synching :-

This is by combination of upper effects.

*Can sense environmental things :-

By this effects man can sense environmental things or things around him (things in nature)

Things like behind him is what and sometimes who or which thing or which animal, Like that sound him is what which he can't see he or she can sense.

Like that he or she or any person can watch anywhere and he will know at other place is who or what.

*And some physical effects and environmental effects (effects like covering around thing) :-

In this effects man cover around things like air or sometimes things but which are in capacity of brain or senses having these effects.

By this effects any person can attack on other or defence to attack by surrounding environmental things or surrounding matter. And of two or more person will do it together on other then this effect can more powerful. Sometimes person can damage things by this effect.

*Can communicate or send data through machine like mobile phone or computer or satellite (if suitable and any suitable):-

By this effect anyone can communicate or send data by synching brains and they can talk with each other or they can do the effects described in this paper or book.

And can send signals through satellites to aliens by without language talking and showing illusions or inserting feelings or showing things. Like calling them or knowing their things.

Or he can know by this that who is where and that place and things are what.

*Any person can control other person by this synching : -

By this effect any person can control other person and he will make him doing things which the controller want to do.

Some dangerous things like make the target kill other person or make him suicide, rape etc.

As described that by watching target and around him, he can control.

*Can change mental state by synching or we can say inserting :-

By this effect or feature human can change mental state of other by synching. Like

sometimes human do meditation and they feel calm may be their metal state feel calm

like that human can change mental state .

This effect can be advantageous like

anyone will suitable for the mental state inserted by other or sometimes it can be for disturbing mental state of other.

*Can know what is going on in other person's mind : -

By this effect human can know what is going on in other person's mind and he can do some tricks to misguide his target and can do combination of upper effects. And he can know what is target thinking or his feelings while it or his mental state while it or can predict what target will think after knowing targets current state of thinking.

Like that, person can take precautions of what target will do after his current thinking or plan means any thieves or any criminal.

Inverse of that anyone can plan what person will do and then what to do to take action of his plan like crimes or any other works.

*Can know memory of other person :-

By this effect any person can know targets memory stored in him, not full but some. By this effect or feature human can know memory of targeted person or many persons. This feature can be harmful because anyone can know informations means confidential informations like

target is who, he lives where and some other information or like this informations. But sometimes close persons of target can know some good information and then they can guide them or tell them about their mistakes or they can tell them what to do. Like that the person can copy feelings or mental state or inner state.

Note :-

These effects are possible if Infront of person or targeted person will not oppose if he

will in range of the brain

synching.

Like it these effects can be on many persons means what can be the capacity of humans brain.

Note :-

Upper things are possible if the targeted person will not oppose or his mind will not oppose.

Now things or effects humans brain can do inner of human's body :-

*Can show illusions to ourself :-

In this effect or brain show illusions to ourself. And can show illusions with feeling or mental state that it is real or sometimes in front of us illusions. By this effect person can show presentation and sometimes it helps in understanding.

*Can speak with us or hear us :-

Our brain can speak with us or hear us things or talking. Like that our brain can hear talking of many people or characters created by them with images and we can talk characters created by them.

-By this effect or feature we can make or our brain can show autopresentations or pre planning or any rehearsal or what will happen means our plan or can create scene of any situation or helps in understanding any book.

And this effect can be for any time means one hour or two hours or for any much time continue leaving sleep.

This effect or feature can be with feeling and mental state suitable for it or by inner state changing.

Sometimes our brain can show this effect or feature in sleep.

*Can do sensations: -

By this feature brain can do human body sensations like cold or water fell on us or any other sensations like this.

*Can move body parts like artificially.

By this effect or feature brain can move body parts of body like artificially.

It can be beneficial in sports and any other work like driving etc.

*Can change inner state like temperature :-

In this effect or feature human's brain can change inner state of human or it's own body. And sometimes brain can change some part's temperature or some parts' temperature. By doing this effect human's body can be familiar with any work which have to do different from his body temperature. And sometimes for any habit with changing mental state of liking/like it or combination of upper effects or features. It can to increase temperature or decrease temperature.

*Can change mental state:-

In this feature or effect human's brain can change mental state like sometimes human mental state changes like in anger or means irritated so in that he get confuse that what to do or he/she/person do any work like crime or wrong work, so human's brain can change the mental state for convenience of doing work or manage work and can suggest or give start of what to do or alternatively can give suggestions.

And can insert feeling or can give feeling, like artificially.

*All these effects can temporary or permanently also.

Funny :-

And sometimes our brain can make us mouth smells and sometimes it smells us that or

any other smell like

that, means it let us smell any smell.

In this synching

Our brain can do sex with other or many

or we can experience sex ourself with all these features or effects or some feeling like in real and with all senses mainly sexual senses. And our brain,

Sometimes our brain shows us playing games by our participation by our senses like vibration and like that it can feel any scene like war or sports like football, isn't it funny? Ha ha ha.....

Can be proved by various methods.

Conclusion :- Human can do these all things if proven by proper method. So these assumptions are beneficial human in may fields and many fields in future. Can be research because I experienced it.

METHODS OF PROVNG CAN INCLUDE TAKING HUMANS IN RAYS OR WAVES LIKE X RAYS AND DETECTING THE TRANSFERRED AND READBLE PARTICLES AND OTHERS.

I know many,

Interested contact me.

Subtitle(2) : - Assumptions about Properties of water (observations or properties or research paper.

Can be called as laws.

Abstract

In this paper properties or behaviors of water ripple or water are given. Water behaves or acts very much different types of behaviors. Like that water have many properties like ripples, bubbles, vapors etc. In this paper(2) the properties of water ripples are described.

Introduction

In this paper the properties of water described. In today's world the geographical things are happening like global warming or tsunami, as well as the scientists are finding or they predicts that because of what the Earth is this type like somewhere is water and somewhere is land, like that in sun also explosions happens and it may be like these laws or paper because it is liquid. So this paper can give a idea that how the geography of Earth and outside planets is.

Business Analytics

First of all this paper can collect a good revenue by the environment observations satellites as well as channels and companies like NASA. And as well as can be advantageous for people for sea travelling in boats, big ships, defence ships etc. And can be a same thinking to new liquids particles or its combinations, after all water is also a particle or its combinations. And from syllabus books which collects good revenues by institutions and from students and scientists.

Main paper(2)

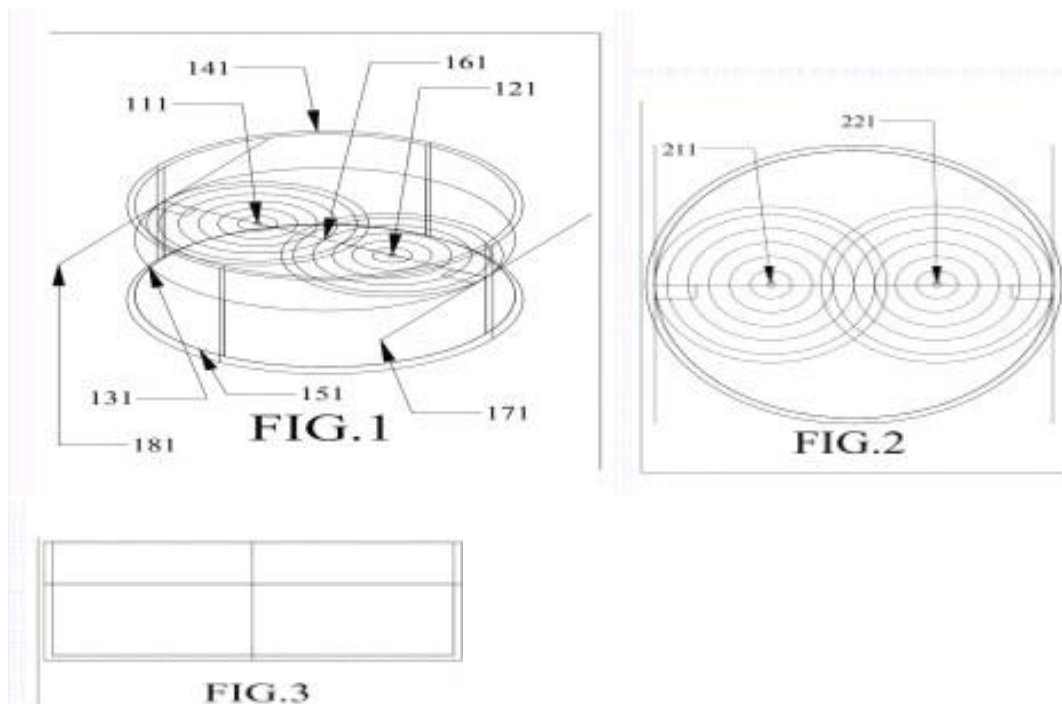

1. This Law of water ripples is for finding the point of contraction when point of expansion is given or known in steady circular water surface. Practical of this law consist of one cylindrical tub and water poured in it and a water drop for dropping in water.

In law of water ripple, when something drops or falls or sometimes vibrates on the surface means in circular water surface then the circular ripple is forms then the distance of point of expansion of ripple from tangent perpendicular to line going from center and going through point of expansion is equal to distance of point of contraction from mirror of first tangent perpendicular to line going from center of circular surface and going through point of contraction.

Law of water ripple gives the distance of point of contraction from tangent perpendicular to straight line going from center and through point of contraction and point of expansion when point of expansion is given or known.

Fig. 1, point of expansion¹¹¹, circular tub¹⁴¹, water surface¹³¹, water level in the tub¹⁵¹ to ¹³¹, tangent perpendicular to straight line going from center and point of expansion¹⁸¹, point of contraction¹²¹, tangent perpendicular to line going from center and point of contraction¹⁷¹.

Fig. 2 illustrates top view of fig.1, point of expansion²¹¹, point of contraction²²¹. Fig. 3 illustrates front view of fig.1

Note - The circles around the point of expansion and point of contraction shows the water ripples after dropping something in the water.

The law of water ripples, it is applicable for shape rectangle. Or many symmetrical shapes.

The law of water ripple, it is applicable for finding distance of point of contraction from center which is equal to distance of point of expansion from center.

According to force it can vary but force can be calculated of that and then proportion or its formulae can be calculated or force proportion can be calculated In law can change according to force or gravity and place to place

Addition to laws or assumptions : -

If hollow rod specially of glass or any other like inserted in liquids not specified and its upper end which is out of liquid not specified how much is closed then the rod is took back then the liquid don't fall it remains in it.

Like that if any hollow rubber tube is taken and it poured in liquids not specified then of we give force to it especially noticeable is force of intake then it continues or liquid continues going or way or motion in which force is applied (height is not specified) All law / assumptions methods are robotic point fixer means by rod or any other or any sensor suitable or this as a research if invented or A.I.

Scientific method for laws are scanning or by camera with measurement or any other like it and without this are with slim rods or rods placed in vessel or tub or drum or like it sometimes at end of vessel or tank or drum or any other the point of contraction don't found.

2.

If we e strike any round vessel or round things containing water filled with it and at horizontally plane or at 90 degree from the bottom's surface's center of water or vessel then the point of contraction of water ripples will be the center of the upper water surface.

And if we continue striking or(vibrating or by any sound or any cause) then concentric circles forms of water ripples at upper surface.

Like that if anything or drop of water falls on same place of water surface then circular ripples forms & if continuously falls then concentric ripples forms.

3.

If we apply force to water for taking round motion or by any other cause then the middle surface will be or will take downward level or level of middle portion will decrease (vertically) and outer level will increase (vertically).

Sometimes it forms different types of shapes (or forms different levels of shapes) 3.

If any hole is (I observed on circular or sometimes patterned shape from which water can pass) and water is on it, then at or after some time the water takes circular shape while going in that hole.

4.

If any water level is on any surface and there is no obstacle and if the ripple is formed by any cause then the ripple will not come back.

5.

If there is water filled in anything & any empty thing gone in that water then water level increases & if that vessel or that empty thing got opposite or reversed then bubble forms & it goes upward.

6.

We can not do breathing & eating (in taking) or drinking at same time.

7.

If anything dropped in water and ripple formed (by any cause) then it continues its shape by increasing the ripple in its shape.

8.

If in any circular shape (or any other shape) anything falls then sometimes may because of extra force, the ripple's or ripples' come-go motion continues double or many times.

9.

I observed but not sure that in oils or similar liquids the ripple don't come back.

Conclusion: - These assumptions are possible if proven by proper methods can not change or can be change. These are judgemental observations but are very much focused and seriously observed.

METHODS FOR PROVING CAN BE BY POINT FIXER SCANNERS OR OTHER SCANNERS AND ROBOTIC POINT FIXERS OR OTHER.

I know many methods, interested contact me.
