ABSTRACT:

With the emergence of the internet and it becoming a part of our daily lives the way we receive and consume news has also changed it has had very positive and negative effects on our lives. Through the internet an average person is now more informed about the world than ever before but it is also used to spread misinformation which has become a major issue in our world. Every media and news organizations have their own agenda that they would like to push. News is reported by these organizations with their biases with the internet being able to reach a large amount of audience these have a huge impact on society. A ordinary individual may only consume news or read articles from organizations they are familiar with this leads to this can lead the person to susceptible to propaganda. The ‘News app’ presents readers with news from different sources and allows users to filter news coverage based on political bias, time, location, and interest. Readers can scroll through the news feed on the homepage to find a headline they want to explore further all stories are tagged based on political bias. Having access to a range of sources not only allows readers to see how bias impacts coverage, it also encourages greater awareness and informed decision making.

Keywords: Internet, Misinformation, Media bias, Propaganda, Awareness

Introduction:

General Introduction:

The internet has become the part of our life. An average person is able to access information from internet than before. People of every age range use and have access to internet, the risk of spreading misinformation have also increased drastically. People will believe these and be misguided. But what if there is a platform that provides news that is totally unbiased? Where people can filter and choose what they want to believe and we give the choice to people considering most people follow only one source This is the main concept of “Les Nouvelles” app.

Importance of news in society:

Provides information, one thing about news media is it will always provide information. This includes information about what’s going on nationally and internationally, health, politics and even celebrities but be wary of fake news as it can give you false information. The news media keep us updated and will always timely.

Unbiased News:

So what is unbiased news? provides news with no bias and reader can form their own conclusions. Public around the world overwhelmingly agree that the news media should be unbiased in the coverage of news, which includes politics, technology, health and even celebrity news. The news from different fields should be reported fairly. People are far more mixed in their sentiments with many saying that their need do not deliver it.

Literature Review:

Global public sentiment toward news coverage reflects a shared desire for unbiased reporting, with many individuals expressing a preference for news that is impartial and based on facts rather than subjective perspectives. However, a clear division emerges when assessing whether news media outlets actually deliver on this expectation. Trust in the media becomes a pivotal factor, as some people place confidence in their local or national news sources, perceiving them as reliable and unbiased, while others harbor skepticism and believe that media outlets are influenced by political or ideological considerations. The degree of political polarization within a society further contributes to this divide, shaping how individuals interpret and evaluate news coverage based on their own political affiliations. Additionally, concerns about media ownership and control raise questions about the potential influence of powerful entities on shaping the narrative, fostering differing opinions on the neutrality of news reporting. As societies grapple with these complexities, the pursuit of truly unbiased news coverage remains a global aspiration, albeit one viewed through diverse lenses. [2] An unbiased study of television news bias involves a comprehensive examination of news reporting across various channels to assess the presence or absence of political, ideological, or

other forms of bias. This type of research typically employs rigorous methodologies, including content analysis and audience surveys, to objectively identify patterns in news coverage. Researchers scrutinize language use, framing of stories, and selection of topics to determine whether any systemic biases exist. The goal is to provide an impartial evaluation of how different television news outlets present information, shedding light on potential influences that might impact objectivity. Findings from such studies contribute to the broader understanding of media dynamics, informing discussions on journalistic integrity and the role of television news in shaping public perceptions. [3] A recent research study has reaffirmed that PBS (Public Broadcasting Service) stands out as the most trusted and unbiased source for news. The study, conducted through a comprehensive analysis of news reporting across various media outlets, consistently identified PBS as a beacon of reliability and impartiality. Viewers and readers participating in surveys expressed a high level of trust in PBS, attributing this trust to the network's commitment to delivering news content without partisan or ideological leanings. The study likely considered factors such as journalistic integrity, factual reporting, and a balanced representation of diverse perspectives. This recognition underscores PBS's reputation as a credible source for news, providing audiences with information that is perceived to be free from the influences that can compromise objectivity in other media outlets. As society places increasing importance on reliable information sources, this research reinforces PBS's standing as a trustworthy and unbiased purveyor of news.

Research Topics:

News App Evolution:

The evolution of news apps has traversed a compelling trajectory, mirroring the seismic shifts in media consumption patterns over the years. In the nascent stages, news apps were essentially digital extensions of traditional media outlets, providing users with a convenient platform to access articles and updates on their mobile devices, as technological advancements gained momentum, these apps underwent a metamorphosis, incorporating a plethora of features and functionalities that redefined the user experience.

One pivotal aspect of this evolution was the integration of multimedia elements. The static world of text gave way to a dynamic multimedia landscape within news apps. Video content, interactive graphics, and immersive visuals became integral components, enhancing the overall storytelling experience. Users, accustomed to traditional print or broadcast media, found themselves immersed in a new and engaging digital realm.

The advent of personalized content delivery marked another significant stride in the evolution of news apps. Recognizing the diverse preferences of users, algorithms were employed to curate content tailored to individual tastes and interests. This personalization not only increased user engagement but also contributed to the creation of echo chambers, where individuals were exposed predominantly to content aligning with their existing beliefs. While fostering a more customized news experience, this trend also raised concerns about the potential reinforcement of biases and the creation of information silos.

Real-time updates and push notifications emerged as game-changers in the news app landscape. Users were no longer confined to scheduled broadcasts or newspaper editions; instead, they received instantaneous notifications about breaking news or developing stories. This real-time delivery not only heightened the sense of immediacy but also fueled the demand for constant connectivity and instant access to information. The 24/7 news cycle became a reality, with users expecting to be informed at any given moment.

Unbiased News App:

The core strength of the Unbiased News App lies in its commitment to delivering news content free from partisan leanings or ideological affiliations. In an age where media outlets often find themselves aligned with particular political perspectives, Unbiased News App positions itself as a reliable source dedicated to presenting information without inherent bias. The app employs a meticulous curation process, drawing from a diverse range of reputable sources and utilizing advanced algorithms to filter out subjective elements. This approach ensures that users receive a balanced representation of events, fostering a more nuanced understanding of complex issues.

The user interface of the Unbiased News App reflects a commitment to simplicity and accessibility. The design prioritizes clarity, allowing users to navigate seamlessly through categories and topics of interest. The absence of sensationalism in headlines and content presentation contributes to a focused and informative user experience. By eschewing clickbait tactics and prioritizing substantive reporting, the app cultivates an environment where users can engage with news stories without being bombarded by sensational or emotionally charged language.

One of the standout features of the Unbiased News App is its transparent sourcing and citation practices. Each news article comes with a comprehensive list of references, enabling users to trace the origins of information and assess the credibility of sources. This commitment to transparency not only empowers users to make informed judgments about the reliability of news stories but also sets a standard for journalistic integrity in an era plagued by misinformation. Unbiased News App distinguishes itself further by prioritizing in-depth analysis and context alongside breaking news. Recognizing that true understanding often requires more than just headlines, the app provides comprehensive background information, historical context, and expert opinions to enrich the user's comprehension of unfolding events. This commitment to depth aligns with the app's overarching mission to foster a more informed and discerning user base.

Advantages And Disadvantages

Advantages:

- Much more immediate and up to date
- Always have access i.e Mobile Phone, Free
- Can include wider content
- Archive functions

Disadvantages:

- Require internet connection to get online
- News spreads quicker online-people find out news before they should
- Some people are hesitant to pay for subscription
- Older audiences may not have access to digital media.
- Costly to maintain

Conclusion:

Unbiased news is essential for democracy, social cohesion and informed decision-making, and journalists striving for impartiality, individual seeking out alternative sources for information, and promoting media literacy. Unbiased news is becoming increasingly important in today's society. By this we can ensure that individuals have access to accurate and independent news, and can make informed decisions and opinions.
