ABSTRACT

In the given below pages is mention for the report of dissertation. I was place as a researcher, so as being a researcher, I had work on the topic of "A STUDY ON LGBT AND INDIVIDUAL POINT OF VIEW". The principal targets of this exposition are reach to individuals people groups viewpoint about LGBT people group and their kin. From individuals as well as from individuals of LGBT people group. LGBTQ (lesbian, Gay, sexually unbiased, Transsexual, Strange) individuals are not getting equivalent open door, assets, character, basic encouragement, acknowledgment, and regard like other resident of society are getting. Alongside its individuals of society have their various reasons, thinking and point of view about them which could cause them to feel unsure way towards them as each individual is not the same as each other. This study assists with figuring out those different perspective which happens such occasion for LGBT individuals. It additionally demonstrates the various kinds of trouble which LGBT individuals are looking in their everyday life. Administration of INDIA present many plans, regulations, freedoms, rules, and guideline for local area individuals this study assists with knowing are individuals mindful about it or not. The information which assists with directing review is gathered from individuals of Vadodara city. It assists with realizing the reason why individuals responding unsure way when they hear term LGBT. Likewise, to be aware of are LGBT individuals face any sort of badgering in the public eye or wrongdoing. People groups solace and acknowledgment for LGBT individuals for have their own local area, their freedoms and separate personality in the public eye. It likewise characterizes individuals' cooperation with any local area individuals and measure individuals' connection with them.

INTRODUCTION

The International and National Law of every country guarantees basic human rights to everyone. Everyone is born with equal dignity and rights and are free from any kind of discrimination. Human rights are universal and are same for all irrespective of any sex, caste, or creed. LGBT communities have the same human rights as everyone, including the right against discrimination in enjoyment of their basic rights. LGBT is an Acronym generally used for lesbian, gay, bisexual, and transgender persons.

This is study to know about all the possible aspect that occur in any LGBT person's life. Their problems, lifestyle, their need, their social status, economic growth, equality, privacy, law enforcement for them.

This research is help you to understand the social aspect in LGBT's life, the reason behind facing inequality in society (in jobs, education, resident etc.). It also going to identify the opportunity area for them, discrimination, their economic and social, family problem. Not only this but it is also going to help to understand their view and vision and them believes as well. Rights, administration, low , legal action are also going to cover in this also try to identify that any type of crime or harassment are they facing or not.

LGBTQIA+ is an abbreviation for lesbian, gay, bisexual, transgender, queer or questioning, intersex, asexual, and more. These terms are used to describe a person's sexual orientation or gender identity.

LGBT is an initialism that stands for lesbian, gay, bisexual, and transgender. In use since the 1990s, the initialism, as well as some of its common variants, functions as an umbrella term for sexuality and gender identity. It may refer to anyone who is non-heterosexual or non-cisgender, instead of exclusively to people who are lesbian, gay, bisexual, or transgender. Gender equalities is the state of equal ease of access to resources and opportunities regardless of gender, including economic participation and decision-making; and the state of valuing different behaviours, aspirations and needs equally, regardless of gender. Every day, the human rights and dignity of lesbian, gay, bisexual, transgender, intersex and queer (LGBTQ) people around the world are abused in ways that shock the conscience.

L—Lesbian (A lesbian is a homosexual woman. The word lesbian is also used for women in relation to their sexual identity or sexual behaviour regardless of sexual orientation)

G—Gay (A Gay is a homosexual man; the word gay is also used for man in relation to their sexual identity or sexual behaviour regardless of sexual orientation)

B— Bisexual (sexually attracted not exclusively to people of one particular gender; attracted to both men and women.)

T— Transgender (denoting or relating to a person whose sense of personal identity and gender does not correspond with their birth sex.)

REVIEW OF LITERATURE

According to Westbrook & Schilt (2014), there are many different categories that can be used to define sexuality and gender, such as gender identity, gender expression, biological sex, and sexual orientation. According to Marino (2013), a person's sex is best described as "the outside physical or perceived surface identity of a person." Research suggests that an individual's sex is actually comprised of nine factors. A person's personal identity is referred to as their gender identity; (www.glaad.org/transgender/allies) This could include male, female, agender, bigender, gender fluid, and gender queer. According to Westbrook & Schilt (2014), gender expression refers to a person's "core identity or true sense of self," which is how they choose to present themselves and be seen in society.

According to Bradford, Reisner, Honnold, & Xavier (2013), the term "transgender" refers to any variety of people who do not identify with the gender that was assigned to them at birth. Both gender expression (masculine, feminine, or neither) and gender identities (genderqueer, bigender, gender-fluid) can vary among transgender people (Singh, 2012). As a result, transgender individuals can be found across the board; Nevertheless, transgender people are not always transsexuals. Despite the fact that transsexuals do not identify with the gender identity that was given to them at birth, they go on to undergo sexual reassignment surgery or hormone replacement therapy. This becomes extremely complicated because people who only change their hormones may identify as transgender or transsexual, depending on their own perceptions, the possibility of stigma or discrimination, and the support they receive from others. Social Inequality Challenges While depression, anxiety, homelessness, and other social inequalities may be overwhelming on their own, research has shown that members of the transgender community are also at an increased risk of being victims of violence and abuse at the hands of either their partner or strangers. In contrast, a person who identifies as the gender assigned to them at birth is known as a cisgender individual.

RESEARCH METHODOLOGY

TITIAL OF THE STUDY

A STUDY ON LGBT AND INDIVIDUAL POINT OF VIEW

Subtitle

“A study on LGBT”

Objectives:

1. To understand the lifestyle and problem LGBT people face in their regular life,

- Majority of the respondents 81.7% people are not aware about any scheme which is introduce for LGBT.
- Majority of the respondents 70% want to become support person for LGBT community if they get chance.
- Majority of the respondents 58.3% are agreeing with term bisexual.
- Majority of the respondents 74.1% never approached by LGBT community for any kind of relationship.

- There are also some respondents when they come in contact with LGBT person they might feel uncomfortable, weird, awkward or abnormal. But its not with everyone many of them feel they are normal human being like us.
- For many respondents they not any different spices they are just people from different gender like male and female so we should accept them as they are.
- In most of the people's mind comes transgender only when they hear about the LGBT community.
- According to the respondents LGBT people face various problem at same time. Problems like discrimination, loneliness, bullying, trafficking, sex-worker, biasness, lack of support, lack of opportunity, phycological problems, health related problem, lack of confidence, harassment and crime, education, human rights, lack of job opportunity and other too.
- Major respondents believes that LGBT people mostly suffer with the societal problem, then discrimination, education, health, mental health, occupational, economical etc.
- Not every respondent feel same way many of them consider that LGBT people getting all the rights and get equality in society like other citizen have and do not face any type of discrimination.

Conclusion

According to common liberties and constitution of India and furthermore according to worldwide regulation notice that essential privileges are same for each individual from any territory. it isn't situated in any cast, doctrine, variety, or any orientation. LGBT people group which stays for lesbian, gay, sexually unbiased, and transsexual are additionally typical person and resident like other resident of country. They likewise reserve a privilege to give office and assets as other part with next to no kind of segregation. They likewise have right to insurance, right of endurance, right of nourishment and different privileges to get as a resident of country. In this exploration it shows the concentrate on way of life fulfillment of LGBT. In this review there are all out 60 respondents who give their survey on LGBT people group by filling the google structure and fill reply of specific inquiry. It assists with being familiar with individuals' viewpoint about LGBT people group individuals. From gathered information it could work out that individuals and generally youthful age are extremely open and forward toward LGBT people group and individuals. For them they are likewise an ordinary resident like others. They accept that individuals shouldn't do any kind of segregation with any LGBT individual in light of their different orientation and interest and clothing or anything which show them. they likewise accept that only one out of every odd except the vast majority of individuals from LGBT people group are extremely decent in nature, adorable and they have the right to get regard. yet, a portion of the respondents likewise get apprehensive and feel bizarre when they meet any LGBT individual or around them. presently the strange part is they likewise don't have the foggiest idea why they feel as such. There are certain individuals who have companion from LGBT people group and they feel no kind of strange inclination to have companion from that orientation. There are a few respondents who guarantee that there are certain individuals who lives close to them are from LGBT people group. According to them those individuals face no sort of segregation from society or part and everybody are treating them similarly. According to review and research LGBT individuals are moral or society. Their ceremonies could unique, their attire could unique, there interest and orientation could unique yet everybody is different structure each other and we ought to regard and acknowledge that and that is INDIA is about. An extraordinary mix of various factors. Likewise, they seek no kind of extraordinary treatment and get fairness in each area. According to this exploration it can plainly say that LGBT individuals actually deal with numerous issues like in schooling, word related, political, financial, social, biasness, acknowledgment, menace, infringement, wrongdoing, badgering, wellbeing, family issues and so forth as individuals this issue rate some place getting decline as age is refreshing them self. The majority of the respondents know about the plan and freedoms which are presented for LGBT people group and for their kin. Instead of this there are many individuals who have a misguided judgment about LGBT people group individuals and generally for transsexual individuals. which are should be eliminate. This change is in the hand of individuals of the general public as well as LGBT individuals. According to hence concentrate on we can plainly say that this LGBT expression isn't typical for each individual or for everybody. That is the justification for why LGBT individuals should organize a meeting and occasions to interest for their own freedoms. According to a vote-based system they permit to do anything they desire do however in the reason of regulation and rules guidelines. According to concentrate on it can characterize that individuals of society are some places they acknowledge LGBT individuals as individual from the general public as well as suspect certain about them. Yet, there are many individuals likewise who are not capable or intellectually not prepared to acknowledge the presence of LGBT individuals or they think and feel abnormal when they find out about LGBTQ people group. Individuals live with the two-way considerations towards LGBT people group. Some are claim to be alright and strong towards local area yet where it counts when it come face to face association with them, they act strangely or questionable way. In this way, toward the end it can presume that as an age changes innovation redesign individuals are becoming open about the real world and talks about, regard it, and acknowledge it.
