DOI: <https://doi.org/10.55248/gengpi.2023.4.33668>

ABSTRACT

World welcomed German-born Physicist Albert Einstein's Energy-relationship in numerical intellect with Mass & Light's speed from scientific data compiled by fellow-Indian, Bose. Einstein alone announced that energy could be neither created nor destroyed, summarily from those data to scale-up to top order global brains. His brain has been preserved at Philadelphia Mutter Museum posthumously as specimen of human intellect on Global Geography where speed is enjoyed merrily and for Einstein's new way of thinking changes distant from current patterns.

This author anatomized the micro-mind of Einstein to eke out an analogy upon considering that Mass is outweighed by Matter while Light of Spirit (other than Sun Light & Einstein's Light) transcends limits of Mind harboring Religiosity in human intellect on global geography of Earth which, being the sole Super Vedic Conceptacle (SVC), rotates energized by solar radiation (Sun Light) in the Universe. Hence, Vedic Religiosity in the first place. This is **the Vedic Order** in everything including human bodies packed with Mind-Matter-Light-of-Spirit-Energy. So, bonds of Matter-Light of Spirit-Energy are indestructibly tuned to **Vedic Religiosity Graduation (VRG)** in human cognitive intellect. This manifests as linear transformation in human intellect into the VRG opening human-intellect for theory and real-life applications vide macroscopic World on global geography rather than rare microscopic Einstein-throughput.

Also, humans are mere nominees of **the Vedic Order** in varying calibre of VRG-pre-eminence characterized by differentials of physical conditions corroborating current pattern of scientific thought that earliest Homo sapiens arose in Africa at least 250,000 to 300,000 years ago, fossils and DNA revealed bearing in mind that it is the same Vedic-period-earth of the then intra-continental pre-historic proximity of Africa-India's prevalence.

This Paper is promoter of linear transformation as contracting with the non-destroyable VRG on global geography avant-garde.

Keywords: Africa, Conceptacle, Differentials, Graduation, India, Order, Religiosity, Universe, Vedic.

1. INTRODUCTION

In spite of huge archives of religious materials tapped and stored since many centuries in current World of 21st century, the United Nations Organization (UNO) of the day has not yet recognized to declare that the Planet Earth of ours is the sole Super Vedic Conceptacle (SVC) for the mankind.

Nobody knows the reason for such non-recognition state of affairs. What is the hindrance? Why delayed? Why not expedite? The mankind(s) are known as the earthlings. Aren't they?

In non-Vedic contexts of all man-made and ordered-to-make state-of-affairs, such as the Ozone Hole in the Atmospheric Layer, Climatic Change, Green House Gas Emissions, Nuclear Radiation Leakage Incidents, and Air Polluted Index, there have been timely red alerts across the national boundaries, international borders, Lines of Actual Controls (LACs), international flying zones, no-man-flying zones and international waters in the name of safety-standards for mankind, of mankind and by mankind. Then, why not the Vedic context of Earth that the Earth is the SVC for the mankind has not yet come under the purview of the UNO despite everybody including the UNO knowing that in the chronological order/the timeline of the world or world's religions, there are approximately 4,300 religions around the world at the moment which all have been accorded local, regional, national, international and global legal permits of operational validity. The following tabulation gives us seniority of world's religions on the Earth and as to why the Earth is to be accorded the SVC-recognition beginning from the oldest and going up to the newest religion in the order of dating back to prehistoric times up to the recent time, as per multiple archaeological evidences invoking plural prehistoric humans who had preached and practiced religion in course of their existence on the single supercontinent of Pangaea, the later ones of Gondwanaland and Laurasia (or the Euramerica or the

Old Red Sandstone Mass) continents and the current six of continental land masses of the Africa, Asia, Australia, Europe, North America & South America).

Order of seniority	Religion	Symbol	Period	Birth/Origin	Reference to the Earth	Reference to the Universe	Reference to God
1.	Vedic Religion Hinduism Sanathan Dharma		1500 BCE to 1500 BCE	Originated from the breath or breathed forth or breathed out by the God and later were heard by the earthly sages who were taught by the God-Himself. Not based on historical-founder	Yes	Yes	Yes
2.	Judaism		800 BCE to 500 BCE	Moses was Judaism's founder about 3500 years ago originated in the middle East It gave rise to the later time's Christianity and Islam	Yes	Yes	Yes
3.	Buddhism		800 BCE to 400 BCE	Hindu Prince, Siddhartha Gautama(The Buddha) was the founder in India	No	No	No
4.	Christianity		1st Century Common Era	Man named Jesus and his 12 disciples.	Yes	Yes	Yes
5.	Islam		7th Century CE	Founder Prophet Muhammad.	Yes	Yes	Yes
6.	Sikhism		16th Century CE	Founder is a man called Guru Nanak.	Yes	Yes	Yes

For vividness on the SVC, one has to recall to memory that the osculating plane of the SVC became expansive with expansionism as its orientation, no matter the scientific calculus's attempts to fix the age of the Earth as to how old it must have been without realizing such virtues of the SVC , say, geologically potential Vedic stimulations between Ocean and Mountain (OM), Mountain and Land (ML) , Land and Atmosphere (LA), Atmosphere and Rock (AR) on one hand while on the other, the Vedic bridges connecting Land with Ocean, Mountain with Land, Ocean with Mountain and Atmosphere with all these including Rock. Vedic perspectives and modern times on the Vedic-period-Earth inhabited by 8400000 varieties of SVC-species designed, bio-mechanized for movements and let go scot-free by the SVC for living a full circle of zest of life-period via the triadic-medium of Vedic soil / ocean/ air remained the same are not in disagreement basically owing to the above tabulated Religions.

2. RESEARCH HYPOTHESIS

There takes place a linear transformation in human intellect toward the Vedic Religiosity Graduation (VRG) on global geography of the SVC (i.e., our Earth) within the mankind themselves, howsoever scientifically, socially, educationally , culturally and /or otherwise placed are they in the worldly

life's way of experimental Science of data-cum-themes called non-Vedic beliefs outsourced and whosoever are they , without exception to any one of the mankind on the Vedic Soil of the SVC , unless and until otherwise stated.

3. RESEARCH QUESTIONS

- Can anyone of mankind ignore or deny the Nature's Patterns around us in real-life-world?
- Could anyone, he/she, from mankind has ever been able to command the Nature to whims?
- Can anyone from mankind explain as to what is the language of the Nature of patterns found in their balanced charms of symmetrical perfections, let alone that of the Pythagoras to Fibonacci verbalizations?
- Can anybody from mankind complete his/her study in exploring visual and auditory patterns found in nature in a series of Nature's Patterns around us expanding from the organic to the physical to the auditory patterns & scenes and/or scenes & patterns and/or patterns minus scenes and/or scenes over patterns and/or patterns divided by scenes and/or scenes into patterns and/or patterns & scenes in factorials omnipresent in The Nature of Patterns?
- Can anybody undertake to call a halt to the Nature's far away or nearby "fracture mechanics" within frozen dirt leading to bigger fractured rocks?
- Can anyone from the mankind foresee or act practically-in-no-time to stop a Nature's crack in-depth from becoming a catastrophe in the history (happened) and in the future to come?
- Has anyone of the mankind, on his/her own, happened to be the Author-cum-Creator of certain patterns without the knowledge & experience beforehand of that of those natively fundamental patterns originally attributed to the natural world?

4. RESEARCH OBJECTIVE

Bearing in mind that it is the Vedic-Period-Earth (VPE) for proximity of Africa-India's intra-continental prevalence and additionally, the SVC *per se* is none else but the VPE, the author's objective is that the global geography is Vedic-spirited-spreadsheet-number-one of consolidated OMLAR's Vedic stimulations acting with Vedic homogeneity within and from Vedic heterogeneity's without-ness and so, thereby becoming into transformed linearity without Vedic geo-heterogeneity giving rise to universal connectivity into human intellectual bastions to arrive at the Vedic Religiosity Graduation (VRG).

5. RESEARCH BANE

- The search for knowing which is the Vedic handle making creative human being(s) arriving on the global geography
- The search for knowing the presorted and prescreened bio-life-resonance in conjunction with Vedic stimulations in human intellect as the personified visible and invisible Stars and their Constellations in the Blue Sky Configuration in the organized Universe , let alone the very much not yet unidentified Universe by the mankind ever since the evolution of mankind.
- The search to trace which cause(s) of human intellect of the above structured humans acts as a breakaway entity from the network of intellectual-Vedic-consonance operating on the global geography of the SVC.
- The search for Vedic non-existing controversies / complications / problems by way of formulation of yet another new Veda, as if one in the offing, from existing non-Vedic silhouette(s) of controversies / complication / problems which are merely matters of non-Vedic projections of massive experimental skills propagated through the upcoming theories and philosophies dwelling on how to bring into existence what is not existing known as the *Brob-Ding-Nag* of manual developments.
- The search to know as to why it is time-consuming slower process lacking in preferred speed to divulging to the mankind at once all of the Supernatural Power, otherwise called the Abstract Maya Potential due to and at the instance of the architect of the Veda , without setting aside any remainder whatsoever .
- The search to challenge in self-appraisal and/or attempting to question to protest as a matter of individual right and/or leadership right , the changes/ exchanges/exchequers of linear and non-linear transformations in human intellect of the mankind collectively designated as the Universal Set in the Vedic Universe due to and at the instance of the architect of the Veda .

6. RESEARCH JUSTIFICATION

- This Paper is to bring out into daylight that human beings are the creations of the highest order in the ladder of structured intellect and the reform-transform-preformed mental Vedic makeup embodiments who yet not command to consider themselves wish-born unending-selves as well as unending-slaves of a non-Vedic Universe Faculty belief.

- Taking shelter in the leadership of Light confers the honorability of demanding ‘lead kindly the light’, the latter is not only the Light but also is the incarnation of the Knowledge which in turn is the incarnation of the Veda. And, which again, later on is discovered and found to be the re-incarnation of the light of the Spirit of Veda revealing as the sole linear transformation in human intellect to Vedic religiosity graduation on global geography
- The Light of spirit transcends limits of mind harboring Vedic Religiosity in mind with the Earth per se being the sole SVC (Super Vedic Conceptacle) of Matter energized by solar radiation (Light) in Universe. This is the Order in everything including the human body made up of mind, matter, Light of Spirit and energy.
- Bonds of Matter-Light of Spirit-Energy called Vedic Religiosity Graduation (VRG) within the human intellect’s mind-spread-sheet are indestructibly eternally balanced ones.

7. RESEARCH SIGNIFICANCE

- The significance of the Vedic-period-Earth opens into two commencement channels of the Vedas and the Earth (SVC) with the vitality of mundane world relativity to our understanding of Nature which in a nutshell is what the mundane reality is all in entirety.
- Without the two of Veda and Earth, there cannot be flow of social applications, methods, methodologies, let alone the self-serving bigger Sciences in public interests.
- Imitating the troughs and crests of the OMLAR (Ocean, Mountain, Land Atmosphere, Rock) which is the functional domain of the SVC, even elementary Science and Science of natural elements as seen below could not have come revealed into the light of human intellect called the Light of the Spirit, which should be better called the Light of Human Spirit.
- Kudos to the mankind for coming up with an evolved and made easy to understand for synthesis & analysis in research activities in the name of naturally produced chemical elements by the ever-green SVC designated vide a periodic table matrix..
- The above aremagnum opus by way of the human intellect, in courtesy of the SVC.

Fig. Periodic Table of Elements

8. LITERATURE RANGE FOR SURVEY & REVIEW DIMENSIONS

8.1. Pal, T. (2012). *Physical Geography during Vedic-Civilization in the Journal of Academic Research in Progressive Education and Development*

The Geographical Thought of Veda can be seen in Rig Veda. The Earth is divided in two hemispheres and worshipped as the mother Earth for happiness. In Vedic literature, there are different geographical observations made. The rotation of the Earth, the Sun and the day have been analyzed in

Veda. Earth was worshipped as Goddess which reflects the environmental deterministic view of Vedic knowledge. Vedic literature glorifies mother earth as the goddess earth by saying the establisher of mass people and shelters. Through the lighting in night, the darkness can be removed is the geographical philosophy found in Veda. Nature has been dealt in different portion of Vedas with geographical explanations. In Veda, earth was taken as something living that can feel the pain when drugged. The earth's origin is dealt with significantly saying that before the earth originated, it was completely water periphery and that water is free from life. So it can tell that Vedic Rishi knew about the earth history in right way.

8. 2. BishalGnyawali (2019) Review of Vedic Literature from the Perspective of Physical and Human Geography

Vedas are earliest literature on the Universe meaning knowledge. Veda explains origin of universe and origin of earth. The time of Veda is more than three lakh years before today. It is believed that Veda originated from mouth of Brahma, then moved through hearing and memorizing system. Brahma told Veda to Narada who told Veda Vyasa who codified Veda in graphic form. Veda Vyas had organized and divided the single Veda into four. Fire, wind, water, earth are taken as different forms of god and praised as human to environment interaction. People are discouraged for deforestation which meant not to destroy home of god.

8. 3. Dr. S.R. Verma (2019) PHYSICS: An Integral Part of Vedic Wisdom

About Spirituality-Spiritualism-Science-Physics-Intellect-Veda, researcher Dr.Verma has this to say.

All the physical forces of the Universe follow the course of eternal law. The seed of scientific facts lie in Vedas. The Vedas stands for the direct experience of Reality through mind. Vedas uncover the knowledge of total potential of natural laws and human awareness. Vedic seers had an intellectual urge to know how the universe came into existence. Rigveda provides us knowledge of force of gravitation, birth of star and origin of the universe and complete understanding of the origin of the Universe. Recent scientific discoveries seem to validate the concept of Vedas. Physicists and Cosmologists are close to proving that science and Vedas seem to be saying the same thing. Cosmology is very important field for both science and spirituality. In fact, cosmology can be regarded as one of the meeting points between science and spirituality. Agni is meant to convey the oblation offered through it. Fire place to the gods. Agni is used for all form of energy.

8. 4. Pal, T. (2012). Physical Geography during Vedic-Civilization in the Journal of Academic Research in Progressive Education and Development

About Veda & God, the researcher T. Pal has this to say.

The available earliest literature of India has unanimously accepted the four Vedas as revealed to the rishis at the time of the universe. The Vedas are direct utterances of God. The expression Veda means knowledge .No doubt all the Knowledge arises only from God; otherwise, how could the creation has taken place? Creation involves a vast amount of concealed knowledge divulged in the manifestation processes themselves. Knowledge was there which arose as ideas of the Creator. The God reveals his ideas endowing man with the faculty of speech and to inspire him with ideas through his brain and to induce him to the utterances. Such ideas as from the content of the Vedas are revealed only to profound thinkers who had gone through life's experiences and gathered wisdom like certain Munis/Rishis. Before language had developed to such an extent so as to enable one's thoughts and ideas to be translated cogently into speech, the knowledge which remained locked up in man's brain was perfected. Thus man himself was the author of the Vedic revelations directed by God. This truth is borne out by Rig Veda.

8. 5. Dr. S.R. Verma (2019) PHYSICS: An Integral Part of Vedic Wisdom

About Research-Consciousness-Global Civilization-Vedic Science of Atom-Light-Water-Fire-Electricity, researcher Dr.Verma has this to say.

Looking at world civilizations, the Vedas are recognized as the oldest and most ancient scriptures available to mankind. The human consciousness we see today is the result of billions of years of evolution on this planet. The Vedas discuss the evolution of the universe. The existence of a powerful scientific core in the Veda cannot be denied. The term Vedic Science has gained popularity throughout the world in recent decades to indicate the science hidden in the Vedic literature. Words used in the Vedas have multiple meanings, including research, scientific, and spiritual. In the ancient stages of civilization, philosophy, science and culture began to intertwine. In fact, science in Vedic times was not classified according to the same pattern as it is today.

8. 6. Dr. S.R. Verma (2019) PHYSICS: An Integral Part of Vedic Wisdom

About Vedic Science of Atom-Sun Light-Water-Fire-Electricity, researcher Dr.Verma has this to say.

Vedic science is based on the ancient tradition of obtaining knowledge through the study of consciousness. Our great seers, sages and sages dedicated their lives to the truth, turning their bodies into laboratories and conducting experiments on themselves. The seers entrusted all their knowledge and wisdom to the Vedas as the key to deciphering the scientific facts hidden in the Vedic literature. Vedic language is marked by an extreme economy of expression. In ancient times, India occupied an esteemed and elevated position among its contemporaries in the world. Physics and philosophy are complementary. The broad philosophical conception of atomic structure of matter originated in ancient India. Philosophical heritage of India is

extremely rich. In ancient India, efforts were made to obtain a rational interpretation of the physical world. Scientific theories are found in the literature of various schools of the Indian philosophy. We find that range of the theories begins with understanding the smallest form of matter in terms of paramanus and it goes up to the dissolution of matter in the Absolute Unity. Ancient thinkers reached a very interesting conclusion that it is the nature of reality to express itself both as unity and diversity. They also affirmed that the Sun is seven kinds of rays and the sun illuminates the moon. Electricity is the powerful seed of Fire God whereas the God of Light and the God of the Sky-Ocean-Water get together heated up and mixed together themselves to complete the composition of flowing water.

9. RESEARCH METHODOLOGY & TOOLS

Research well to bring into existence what is not in existence is without peer. This Paper is an opportunity to become thoroughly acquainted with the thoughts of the greatest of our fundamentalist-Scientists who are god-fearing in their self-securityview of the physical world's demand and supply of Evolution of knowledge in terms of fundamental advances.

Method-wise, one can at the outset be a dependent on Library of References for collection of snippets relevant to one's choice of the main idea for elaborating it into the size of a Research Material or a Public Domain Paper of research-value-worthiness. Research in a nonprofessional's language is hunt for knowledge. For the educated, Research is scientific and methodical trouble to search for information. Primarily, it's an art of scientific enquiry or disquisition. The term exploration is made up of two words.

Exploration = Re Hunt: Re means again and again: Search means to find out commodity

The term exploration is used to collect information about a particular subject. It forms means to chancing out what one doesn't formerly have on record. Hence Research records certain effects or gathered attestations. It promotes movement from the known to the unknown with a literacy bent of mind in letter and spirit. So, Research becomes a systematized literacy for own benefit of store of knowledge. This is information heretofore unknown or a fact one doesn't have. Hence, Research or Research Activity or Research Productivity. For illustration purpose, a Study about 21 Century.

In the words of Professor Clifford Woody of the Michigan University,

“Research ideally is a careful unbiased investigation of a problem.”

-- Clifford Woody

Prof. Clifford Woody (1921-1948)

The Webster's International Dictionary defines research as the collecting of information about a particular subject . So, one can deduce that research is 'A careful critical examination in seeking facts or principles or diligent investigation in order to ascertain something'.

9.1 RESEARCH PROCESS

Just as there are a wide variety of views as to what exploration consists of and great differences in factual practices as to what people explore and how, so there are indispensable perspectives of what the process of undertaking exploration should look like. One can grasp the intrinsic features of research-exploration such as below.

9.2 RESEARCH METHOD

Formulation of the research hypothesis is the most important aspect of the research process.

9.3 RESEARCH HYPOTHESIS

It's a brilliant conjecture about the result of an exploration offer or a vault into the dark! The word thesis is made up of two Greek roots. 'Hypo' means that it's some kind of 'sub-statements', for it's the plausible statement of a proposition. 'Thesis' is about result of a problem which the disquisition seeks to prove in a specific frame of reference.

One can infer so as that "Hypo Thesis = thesis".

It might be observed that a thesis can arise from particular experience, once records, compliances, expert conversations, artistic values, folk wisdom, suspicion, dreams, the sixth sense, unconsciousness or indeed a coma condition like sleep walking and/ or agony featuring!

A thesis conformation isn't obligatory in every exploration. Still, it should crop as naturally as possible in the dialogues of exploration studies in area studies similar as the Africa Area Studies. Take for illustration-- this Paper's exploration that bank on Africa's geek analysis provoked by Genocide propositions or God's languages.

Research Methodology is a way to totally break the exploration problem. In it one studies colorful logical way espoused by an Experimenter. The reclamation is that the entire diapason of logical sweats is wisdom of doing exploration constructively or scientifically. In other words, it not only involves exploration styles but also sense behind the system one uses in the environment of Research. Also, it'll be known as *modus operandi* of a study. Research styles and exploration ways are synonymous expressions used interchangeably within the same compass of exploration and relate to the popular styles the experimenters use. When ways are called logical tools, it implies that that exploration has sole dependence on statistical drudgery-tiles entirely. The below tabulation is easier means of making explicit the scope of method and methodology.

METHOD	METHODOLOGY
1. Conduction of research	Cause of research study
2. Gives solution to a problem	Definition of research problem
3. Fixation of objects	How and why of Hypothesis
4. Information relates to solution	Information collection methodically
5. Collection of new information opposite to inadequate information	Information collected organized technically and per time-line/chronological/glotto-chronological
6. Research activities	Research results or conclusions or synopsis
7. Research techniques within the scope of method	Chosen methods are used.
8. Method constitutes part of Research methodology	Methodology has many dimensions

Fig. Research Method & Methodology Basics (Tele-visionary-version)

Simplified description of exploration methodology is a way to totally break the exploration problem involving a logical studying with colorful way in addition to knowing exploration system. In other words, this means to say that an experimenter needs to design a methodology for his/ her exploration problem working since all problems aren't one and the same in their individual compass and limitation. Thus, no one dissertation or no one thesis can become the end product of research. Taking cue from the salient feature uncertainty of Heisenberg's Uncertainty Principle in Quantum World, Research-exploration for a Dissertation or a Thesis is like a moving object for the moving object behaves like a wave with wavelength spread over a region of space, i.e., a Thesis and also like a particle with position localized in space at certain instant of time, i.e., a Dissertation.

Fig. Werner Heisenberg (1901-1976)

9.4 RESEARCH TOOLS TEMPLATE

Primary Sources of Data; Organizations, People, Notes Unpublished	Secondary Sources; Books, Articles,	Evidences	Examples Illustrations	Analogy & Comparison	Personal Experience
Observation	Interviews	Books	Journals/Newspapers Magazines Webliography Internet.	Statistics	Brainstorming synthesize analyze relationships between ideas and concepts.
Voluntary Consent Statements from governmental state actors	Responsible non-state actors	Academics Area Study Centers Universities	Films Television Channels	State Affairs Media Non-political Experts	Radio Government Publishers

Chart: Research Tools Template Tele-visionary-colored-Version

10. SVC & OMLAR nature supra-Human Vedic Universe

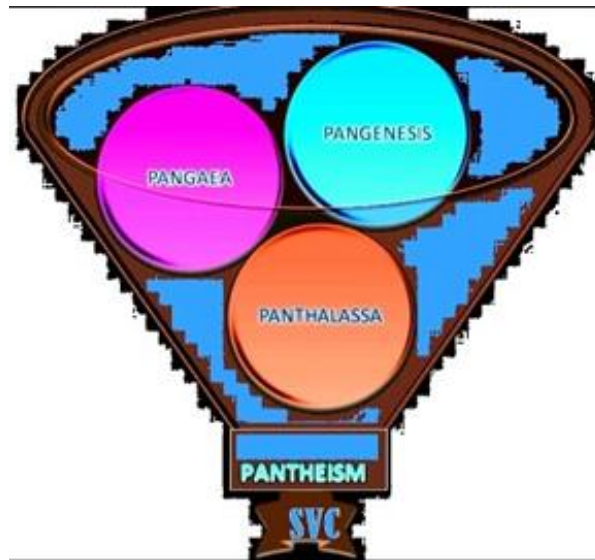

By means of the specific knowledge of the Greek word Pan with the implied sense of all/entire/whole, one can say that Pan alone counts on the Vedic Universe of OMLAR (Ocean, Mountain, Land, Atmosphere, Rock) giving rise to the irrevocable four Pans’ Panthalassa, Pantheism, Pangaea and Pangenesis. Also, it accounts for all continental Geographies / Humans / Creatures for Proximity Series in research lookout. Proximity Series’ insight is escalated viewing from all-inclusive-breathed-out Vedic Knowledge elevating Earth as the sole *Super Vedic Conceptacle (SVC)* bringing into play exponential power of Pan for material comprehension. Overall, the crux of matter is four Pans being invocers of the SVC which functions as the many-one relationship between Pan’s domain of above four irrevocables and OMLAR-codomain.

Human knowledge has become ripe with the accredited irrevocable four of the Panthalassa, Pangaea, Pangenesis and Pantheism. The powerfulness of four Ps vide four Pans for fulfillment of the obligations of the SVC is clear-cut. The specified obligations are, firstly in the continental land of creative design Pangaea , secondly, in the Sustainability of Life’s Movement across Inhabitants by Pangenesis, thirdly in Practice of Vedic Awareness prescriptions of Pantheism and fourthly in the SVC-Conscience-Reality of Panthalassa .

In an equalization mode of representative interpretations, it appears as seen hereunder.

- The Continental Design or Continental Land = The Pangaea
- The Sustainability of Life’s Movement across Inhabitants = The Pangenesis
- The SVC-Conscience-Reality = The Panthalassa.
- The Practice of Vedic Awareness’s prescriptions = The Pantheism

Fig.SVC's Pans Four channelization

11. OMLAR & FOUR PANS MUTUAL CORRESPONDENTS

The correspondence between the **OMLAR** and the Four **PANS** can be explained as that of between the milk and buttermilk. A drop of buttermilk in a glass of milk forms curds which is neither milk nor butter. On churning the curds mixed with water, real butter could be taken out. After butter extraction, the residual is the new and fresh buttermilk in plenty.

From above example, the **OMLAR** and the four **PANS** on thorough examination for inter-connected activities, disclose the following mutual correspondences.

Firstly, the O (Ocean) & R (Rock) of the **OMLAR** are in consonance with the Pan of the *Panthalassa* which is stated to be the primitive Ocean hoisted on the rocky-basined-leak-proof Earth, first of its kind of Vedic creations by the SVC.

Secondly, the M (Mountain) with the L & R (Land and Rock) of the **OMLAR** are in consonance with the Pan of the *Pangaea* which is stated to be the singleton Super Continent on the Earth, first of its kind of Vedic creations by the SVC.

Thirdly, the L (Land) and the A (Atmosphere, i.e., compound of river-flow of drinking water for living species of life movement enabled on land whether belonging to human type / animal kingdom, oxygenated air circulation, white-warm-Sunlight for visibility with climatic bushy/dwarf greenery & plant-lets) of the **OMLAR** are in consonance with the Pan of the *Pangenessis* on the Rocky Earth, first of its kind of conceptualization in comprehension of the Vedic SVC.

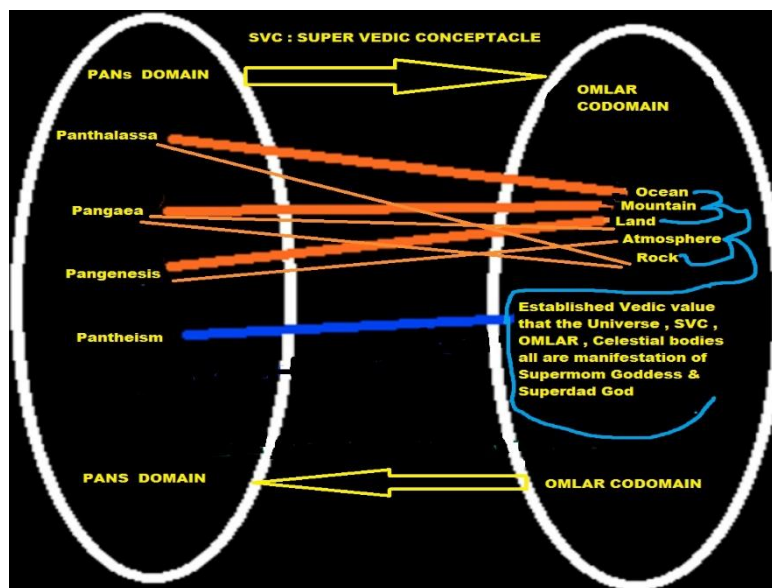

Fig. Many-one functional relationships between OMLAR & Four Pans

Fourthly, the OMLAR as the All/Entirely/Wholly without predecessor in title from among humans / animals since the beginning of Vedic time till the current time, Pantheism came into vogue enforcing Vedic Value that has been invariably trusted that our Earth is a celestial body / SVC but not man-made like the Universe / Cosmos / other celestial bodies in reality being synonymous with an immanent creator deity, say Supermom-Goddess / Superdad God.

In other words, PANs being the domain to the OMLAR codomain or the reverse of this such that the OMLAR can be the domain to the PANs codomain do mean that both substantiate that the PANs and the OMLAR are two sides of the same coin SVC (Super Vedic Conceptacle).

12. HUMAN COGNITIVE INTELLECT IN THE VEDIC UNIVERSE

In human cognitive intellect and scientific practical activity, it is necessary to find the main and crucial link in a chain of events to pinpoint the main task in the whole complex tasks. The order of the links and their form, the manner in which they are linked together and the ways they differ from one another in the SVC & OMLAR linkage in the Universe point out the pace and direction of human

cognitive intellect and scientific transformational processes in the world paving mankind's road to a scientific understanding of the surrounding world-nature, the knowledge and the Vedic Universe itself.

SVC & OMLAR's trend-setter tectonics bestowed the motherly status on Africa on the planet Earth when the very first human being formed on the Earth. This value is such that that it is also of scientific value forever just as Scientists say that genes are proteins as well

as proteins are genes. In other words, conclusively Humans are Africans as well as Africans are Humans! With the passage of time's events under the starred sky, say climatic changes and overall Nature's physical and bio-chemical super turbochargers, the formation and configuration of tectonic plates at one particular moment in commensuration with Vedic Universe on the Earth led to today's Continents from the Pangaea's splitting-forces having separated Africa for the origin or the birth-place of the first human gene.

13. LINEAR TRANSFORMATION OF HUMAN INTELLECT INTO VRG

World ate German-born Physicist Albert Einstein's energy- relationship with mass and Sun Light in numerical intellect from scientific data collected by fellow- Indian, Bose. Einstein blazoned that energy can be neither created nor destroyed, pithily from that data to gauge - up to top order global smarts. His brain has been saved at Philadelphia Mutter Museum posthumously as instance of mortal intellect on Globe for his new way of allowing changes.

Mass is overbalanced by Matter while Light of Spirit(other than Sun Light) transcends limits of Mind harbingering Religiosity in mortal intellect on global terrain of Earth which, being the sole Super Vedic Conceptacle(SVC), rotates amped by solar radiation(Sun Light) in the Universe. Hence, Vedic Religiosity in the first place. This is the Vedic Order in everything including mortal bodies packed with Mind- Matter- Light- of- Spirit- Energy. So, bonds of Matter- Light of Spirit- Energy are indestructibly tuned to Vedic Religiosity Graduation (VRG) in mortal cognitive intellect. This manifest as direct metamorphosis by way of linear transformation in mortal intellect into the VRG opening human- intellect for proposition and real- life operations vide macroscopic World on global terrain rather than rare bitsy Einstein-outturn. Also, humans are mere nominees of the Vedic Order in varying calibre of VRG-pre-eminence characterized by differentials of physical conditions corroborating current pattern of scientific thought that earliest Homo sapiens arose in Africa at least 250,000 to 300,000 years ago, fossils and DNA revealed bearing in mind that it is the same Vedic-period-earth for the then intra-continental pre-historic proximity of Africa-India's prevalence.

14. VEDIC SCIENCE ON GLOBAL GEOGRAPHY IN VEDIC UNIVERSE

Recent scientific discoverers learnt from facts of Vedas when confusion and ambiguity confronted them during their scientific studies and endeavours. Physicists and Cosmologists are close to proving that science and Vedas seem to be saying the same thing. Cosmology is very important field for both science and spirituality. In fact, cosmology can be regarded as one of the meeting points between science and Spirituality. Thus, we can see that whatever cosmologist with all their modern equipments say today about the origin and fate of the universe, their seeds are already present in Veda as verified and declared by many famous known Scientists globally. It is also making rounds in news that foreigners like Germans happened to steal the written-works of Veda and picked up certain basic knowledge(s) to make as their intellectual property right and knowledge-asset.

In terms of the Vedic-period-earth's systems approach to the knowledge of human origins, human organizations, human histories, human kingdoms, human languages and human populations, unquestionable Vedic evidence is available as observed from the ancestral Indo-European settlers belonging twined to Germans' Vedic roots of Indo-European language family as pioneers of Vedic-Research since 1846 AD on Rig-Veda by Rudolph von Roth (1821-1895) and Max Mueller (1823-1900), known as the Veda Vyasa of the Kali Yuga. The German Professor, Alfred Wegener (1880-1930) looking at many pro-proximity universals in geographic locations nurtured by the

Cosmic Nature in the Universe from the beginning of prehistoric times of the Earth, came up driving home his down-to-Earth hypothesis of prefixed 'Continental Drift' as one of the pro-Universals in light of the paleontological wonders of his times. He concluded that the Nature's configured terrestrial fauna and flora with remnants of material-life-objects facilitated by occurrences of fossil organisms which are the geologically altered remains and/or conceptacles of once-living organisms before and after the separation of the Continental rocks.

Fig. German Professor Alfred Wegener

Hereunder given tabulation on the Vedic Science Universal Faculty selected from among the great intellectual souls of the RSS (Rishis-Seers-Sages.)

TABULATION	VEDIC SCIENCE UNIVERSAL FACULTY MEMBERS
RSS Name	Technical Expertise Achievements
Kapila Acharya	Father of Cosmology & Samkhya School of thought. First man to call out Human Soul & Human Spirit. He discovered Matter and Spirit are equally important.
Aryabhata	He gave the World the concept of Zero. He was also the first to proclaim that the Earth is round and orbits around the Sun.
Kanad Acharya	Founder of Atomic Theory & First man on Objects & Elements creating them; Atomic Bonds & Larger Particles.
Bhaskaracharya	Invented Gravity & Planetary objects staying on respective course due to pull.
Bharadwaja Rishi	Planetary motion & Interferences, light, heat, sound, telephony, construction of aeroplanes, electricity and its applications. Classification of Stars in Sky & different energies, Types of fires, lights, Orbits of planets, Earth & Rivers.
Angiro Maharshi	Generation of clouds – changes in clouds, Generations of life of many species, changes in solar energy, relationship between the solar radiation and the cloud formation, Generation of Navaratna Stones from solar energy
Shaktyayana Maharshi	Study of vapour – 84,000 vapours, their layers, influences on Earth and Plantation, 84,00,000 medicines, instruments to detect the vapours
Sage Narada :	Studied 128 types & uses of fires, colours, & quantities with measurement of heat. Types of smokes generated from different matter and collected by certain mirrors. Smoke examination by using acids & poisonous nature or usefulness of smokes. The applications of these for the growth protection of the <i>body-mind-intellect</i> .
Aswalayana Maharshi	Water–types of water, uses, bathing waters, Agriculture-Plants cultivation
Vashishta Maharshi	Atomic theory, Universe Creation, Atomic energy & Supernatural Paramatma Shakti
Vyasa Maharshi	Essence of Universal Existence with Supernatural Energy & Divine Power, Organization of Vedic Knowledge as Four Vedas written
Parasara Maharshi	Cause of the Creation & Life Species & Atomic theory
Vivaranacharyulu	Studied 1714 languages, life species, food habits-origins-religions-different information in World
Bhodayana Maharshi	Studied different elements-generations, mines, metals-extractions. Poisons-antidotes, Sulphur- Mercury-Ashes Production
Atri Maharshi	84,00,000 of Energies- brand names, Production & meaning of Words.
Bhoja Maharshi	Types of machines, construction of Aeroplanes, Sirens, Music, Dance, Wars, Protection of kingdom & Dolls
Sushruta	300 surgical procedures and 125 surgical instruments, including scalpels, lancets, needles, catheters and rectal speculums; mostly designed from the jaws of animals and birds. Conducted complicated surgeries like cesareans, cataract, artificial limbs, Rhinoplasty on damaged nose, 12 types of fractures, 6 types of dislocations, urinary stones and plastic surgery and brain surgery. Usage of anesthesia, Stitching methods using horse's hair & and fibers of bark.

15. ALBERT EINSTEIN'S HUMAN INTELLECT CONFLICTS WITH SCIENTIFIC INTELLECTUALITY FROM METAPHYSICS TO PHYSICIST TRANSFORMATION

Fault-finding with the confirmed eternal credibility of Vedic value perfected System such as the SVC / OM/ML/LA/AR/ the scripted four structuralized Vedas from the Veda breathed forth for pragmatic Vedic Religious Knowledge, has become an impossibility even for Scientists like Albert Einstein who had to say that as far as the Laws of Mathematics (LOM) refer to reality, the LOM are not certain while so far as the LOM are certain, the LOM do not refer to reality as can be seen hereunder to believe.

The appropriate interpretation of what Einstein said sounds to me (this Author) is that mathematical sciences are a futile exercise beginning from suggestive to persuasive to compelling to ending with enforcement of a half-hearted academic-ritual-bound rigmarole vehemently negating the Vedas /Vedic Knowledge in an attempt for a contradictory life or Living Theory independent of the “Vedic Universe Faculty Belief” culminating into man-made-all-rubber-Universe.

On the contrary, it is easy and fool-proof to be in the knowing with the help of the Vedic knowledge that the Earth from which magnetism, gravitational pull, force to mass and energy via particles or waves or signals or in series of shock-lets *en masse* or vibrations in pack-lets and life evolve constitutes the Super Vedic Conceptacle (SVC) by itself. The need for knowing accurately the time-cum-age-cum-role-cum expiry of the Earth ever since its order of appearance and appointed dot nearby the Moon and Sun as neighbors in the Vedic Universe of Vedic-knowledge-string said to have been breathed out as such by the Vedic-Super-Natural-Supremo (VSNS) attracting our very implicitness through the SVC becomes redundant, hence. Moreover, the SVC which is our habitat got its specific properties of unlimited-weight-bearing, osmosis, absorption, cooling-shelters-within, thermal-storages-within, self-vegetative-catalysis, gold-silver-mines-conservation, reservoir for carcasses and ultimately, being an assurance to ourselves that we are the earth-born sons/daughters of the Vedic Soil with an irrevocable buy-back arrangement post-death of ours. A non-Vedic belief of mankind such as that the ever lastingness of mankind prevails alone scientifically over the Vedic Religiosity in human intellect is to look down upon those Vedic universal Firsts & Start-ups such as the constellation of stars, oceans, mountains, Earth (SVC), seafloor, rocky continents and diamond-hard planets.

The focus on the physical environment through microscopic world of quantum and relativity generalities for Albert Einstein’s human cognitive intellect on Globe, taking into consideration concepts of self and VRG, did not dominate human perception and experience as felt through the brain & mind/minding-brain/ /brainy-mind since, the material universe is obligated to dealing in matter, as in atoms, particles, molecules, waves and planets. In other words, human self has a placement at the heart of worldview of everything from the fall of a sparrow to the birth of a galaxy. That’s why, Albert Einstein happened to say “I want to know how GOD created this world. I want to know His thought”. So, that was the Albert Einstein’s human intellectual capital on April 18, 1955.

16. CONCLUSION

“The Pre-historic Intra-continental Africa-India Proximity Series on the Vedic-period-Earth” when viewed from Albert Einstein’s human cognitive intellect on global geography constitutes a non-controversial avant-garde. Acceding to him, human role-cum-functional duty is responsibility given by the mysterious God whom he addresses as the Old One. He realized the responsibility is both emotional true Science & true Art yet He remains the mysterious Old One. Germans had easy access to many Sanskrit Universities in Germany and Einstein was a born-German. In terms of the Vedic-period-earth’s systems approach to the knowledge of human origins, human organizations, human histories, human kingdoms, human languages and human populations, unquestionable Vedic evidence is available as observed from the ancestral Indo-European settlers belonging twined to Germans’ Vedic roots of Indo-European language family aspioneers of Vedic-Research since 1846 AD on Rig-Veda by Rudolph von Roth (1821-1895) and Max Mueller (1823-1900), known as the Veda Vyasa of the Kali Yuga.
