ABSTRACT

The Sports management system goal is to give which control the activity of very many sports at a time. It also handle the selection pursuit of student to college and to state level. The human will consume low amount of time and when contrast to physical paper work amongst the self closing system. The system will take care of all the maintaining pursuit in the fast bearing. Detail storing is smooth. Paper work and physical work is decreased. The system is easily operated and simple to use.

Keywords: Sports, Management, Events,

I. Introduction

1.1 About the project:

The sports are an entire part of our everyday life, and their popularity continue to develop around the world. The managing sports teams and events can be challenging, particularly for coaches and admin who have to hold a wide range of tasks, from scheduling practices and games to managing athlete date and communication between parents. Anyhow technology has made it easy than ever to manage sports programs through the use of online sports management system. In this page, we will discuss about the benefits of using an online sports management system and how it can help coaches, admin, athlete, and parents.

Benefits of online sports management system:

1. Efficiency: Online sports management systems supply a centralized location for managing all aspects of sports programs, making it easier to coordinate events, scheduling practices and games, communication between athletes and parents, and manage finances
2. Accessibility: With online sports management systems, coaches, athletes, and parents can access info from anywhere at any time, eliminate the need for in-person meeting and decreasing the likelihood of mis- communications.
3. Data management: Online sports management systems supply a easy way to store and manage athlete date, including profiles, performance metrics, and injury history, making it easy for coaches to make informed decisions about training and games plans.
4. Financial management: Online sports management system simplify the payment process, making it easier to collect fee, track financial transactions, and manage sponsorships and fundraising efforts.
5. Communication: Online sports management system supply a platform for effective communication with coaches, athletes, and parents through e- mail,, text messages, and in-app messages.

II. SYSTEM ANALYSIS

2.1 Existing system

An online sports management system is a software platform that is designed to help sports organizations and teams manage their operations and activities through an online portal. The system can be used for various purposes, including scheduling games and practices, managing rosters, tracking player performance, managing finances, and communicating with team members and coaches.,

Disadvantages:

- Student can't see upcoming game information created by admin
- Admin can't update the finished game details

- Student can't pay through online.
- This is the single case. The same problem continue in all the major operations of sports.

2.2 Proposed system:

In proposed system, the online sports management system there are two users, the admin and the student. Admin supply username and password to the students. He also has the only rights to add or modify the given username and password of the student. An online sports management system can help sports organizations streamline operations, improve communication, and provide a better sports experience for players, coaches, and parents.

Advantage:

- No want to clumsy-paper works.
- No need want to be a physically present to book the ground/venue.
- No man processing requests.
- In this part, the students get all the details about the various games and the venue
- The system stores and send all the members details to the admin for request.
- Admin can create a new game against any team.
- It is very convenient for players to see finished and upcoming information about the match.

III. SYSTEM METHODOLOGY

- ⇒ Admin login
- ⇒ User login
- ⇒ Sports event details

3.1 Admin Login:

This would allow the admin to manage user accounts, including creating new accounts, updating existing accounts, and deactivating or deleting accounts as necessary. The admin should also be able to view user activity logs and track .

3.2 User login:

Users should be able to view upcoming game schedules, including dates, times, and locations. They should also be able to set reminders or notifications for games they are interested in.

3.3 Sports event details:

The event overview should provide a brief summary of the event, including the date, time, location, and participating teams. This section should provide more detailed information about the game, including the rules, format.

IV. CONCLUSION:

Online sports management system have a revolutioned the way of sports program are maintained, supplying a middle platform for maintaining event, athlete data, and finance. By simply the management process, online sports management system to allow coaches and admin to listen on what matters most: helping athletes reach their possible.
