ABSTRACT:

Career guidance and counseling is considered to be a very broad and expansive concept, there are many factors that need to be considered in order to effectively implement this function. guidance and counseling about your career at the post-secondary level and includes interaction between career counselors; One who should be an expert in his field, he should have all the skills, abilities, knowledge and information about job opportunities, prospects, opportunities available and should have the ability to communicate effectively with the person seeking counseling and guidance. On the other hand, for students or job seekers or a person who is already employed and ready to make a change, effective communication skills, a pleasant personality, a friendly nature, a friendly attitude, well qualified must have. Have the necessary skills and abilities to work and be employed. In this research paper, the researcher has undertaken research to identify the importance of career guidance and counseling at the post-secondary level; the main areas that have been outlined in this research paper are understanding the importance of career guidance and counseling, the importance of career guidance and counseling results on the basis of gender in male and female students.

Keywords: Mental stress, Academic Stress, Academic Streams

Introduction

Guidance and counseling services are very important tools in human development especially during adolescence. The stage of adolescence is characterized by rapid growth and change physically, socially, spiritually, morally and intellectually.

Choosing the right career is essential by every individual for optimum utilization of human resources. Career choice the future of a person depends on the maturity of his career. Under this study is an attempt to examine the role of career counseling and Proper decision making of career is essential for taking guidance on maturity, Which is related to career. The wealth of a nation depends not only on the natural resources but also on the geographical location of that country. Human resources are also called the huge wealth reserves of the country. The utilization of geographical wealth to the optimum extent can be possible only when the population of the country is able to utilize its expertise and knowledge to the maximum level. Career counselors are bound to play a more important role today than ever before. Today, career decisions are more informed based on parental recommendations. While Google offers hundreds of resources, finding the right career without help is like climbing Mount Everest without training. Hence, more and more people are turning to career counselors to get the right information to help them shape their career.

Statement of the Study

“An impact on student’s access to career guidance and counseling in Senior Secondary level”

Objectives

- To study the impact on student’s access to career guidance and counseling in Senior Secondary level on the basis of locale (Urban & Rural).

Hypothesis

- There is no significant difference in the impact on student’s access to career guidance and counseling in Senior Secondary level on the basis of Locale (Urban and Rural).

Method of the Study

In present study Survey method will be used.

Surveys can be used to collect information on a broad range of things, including personal facts, attitudes, past behaviors, and opinions.

Population

All senior secondary level students of Jaipur district will be considered as population of the study.

Variables

- The researcher has taken independent variable of career guidance and counseling.
- The researcher has taken dependent variable Senior Secondary level students.

Descriptive Analysis

There is no significant difference in the impact on urban and rural student's access to career guidance and counseling in Senior Secondary level.

SR No	Category	Total Student	Mean	Standard deviation	t Value	level of significance
	Rural	30	22	1.8112	0.835	hypothesis not accepted
2	Urban	30	22.5	2.73342		

Value of t at 0.05 level =	2
Value of t at 0.01 level =	2.66

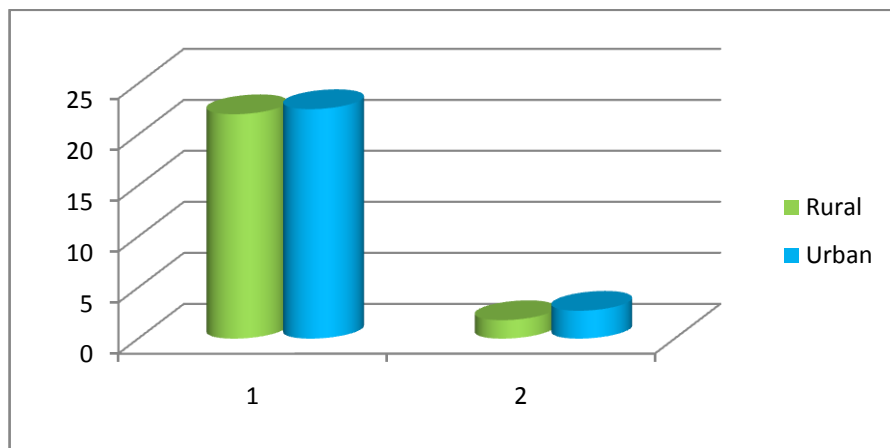

Analysis

The finding for career preparation by the urban and rural students access to career guidance and counseling in Senior Secondary level is 0.835 which is more than 0.05 and 0.01 level of t-value 2 and 2.66 given in the table. Mean of both the group is 22 and 22.5 respectively the standard deviation is 1.81 approx 2.73. A significant difference was found in the hypothesis and it is not accepted.

Discussion

Also, on the Based on the conclusion of table no. 4.5.1.1, it can be said that no major difference was found between urban and rural senior secondary level students on the basis of mean and also on the basis of standard deviation of locale. A significant difference was found between the urban and rural students, depending on which there was no Differences of gender were determined where rural students showed lower career preparation status however the result was not statistically significant, indicating limited knowledge of self-understanding, interest, potential, career choices, and career path. As observed from the finding of the result. I emerged at zero point 05 or 0.01 on the basis of which the hypothesis presented is not accepted.

The above difference can be explained by the below bar graph

Conclusion

The urban and rural students, depending on which there was no Differences of gender were determined where rural students showed lower career preparation status however the result was not statistically significant, indicating limited knowledge of self-understanding, interest, potential, career choices, and career path. As observed from the finding of the result. I emerged at zero point 05 or 0.01 on the basis of which the hypothesis presented is not accepted.

Educational Implications

- This research will prove to be very beneficial for research students in future because in this research, the damage caused by stress has been discussed in detail by the researcher.
- This research will also be very helpful for school, university, college teachers. because in this research, the success and failure of stressed teachers have been explained in detail, after this research will be helpful for the teacher, whether the teacher is of university, college or high school.
