ABSTRACT

In this paper an attempt has been made to criticize one of the thoughts of Nivedita Menon in her novel: Seeing Like a Feminist. Her novel Seeing like a Feminist is promoting feminism and with that she had wrote about rapes cases faced by women of the society. Taking the portion of her novel about her thinking on rapists and rape victims, we have analyzed many of her thoughts. The analysis shows that the thoughts of her about feminisms and rape cases are very different and we can say that she provokes rape victims to live their life in better way but she just forgot about males as she focused only on feminism. Finally, it suggested that Nivedita Menon should also think about males/ boys before any statements to be made.

Keywords: Feminism, Rape victims, Male Society, Rapists, Equal Rights

Background and Motivation:

The growth of society is to be made through feminism. The word feminism may sound different to everyone but the real meaning of feminism is just to give equal rights to the women as men and not to pull down men and promoting just feminism. If we are promoting feminism that doesn't mean we don't focus on the problems faced by the male society. Being a girl, it is also our right to protect men's rights also.

INTRODUCTION:

Feminism is an important factor that affects any country's progress. In all the countries Feminism should be promoted as when the promotion of women is there in country, it will promote the country's development and growth. Most of the countries are now focusing on Feminism. Many writers, poets, politicians are also there who are promoting feminism, Nivedita Menon is also one of the writers and a professor of Political thought at Jawaharlal Nehru University, Delhi, who is promoting feminism and wrote many articles and a novel: Seeing Like a Feminist to promote female equality with the males. In her book she mentioned about rape victims and the laws against rapists too. She wrote that the strict actions should be taken against the rapists as soon as possible after the allegations has been made to him anyhow, but, the false allegations could be there. In her book she also mentioned about the false allegations as there might be some chances that the false allegations could be made by the woman to a man but it could be ignored as all the laws has been misused by the people so what?? If this would also be misused by some women as the others. And if any of the allegation found to be false there will only be a fine, or up to 6 months in prison is there for the females. Nivedita Menon didn't state these problems faced by males in her novel: Seeing Like a Feminist.

OBJECTIVE:

The objective should not only the promotion of feminism but the mankind too. The following are the objectives to promote Mankind:

- Protection of everyone as the feminism do not means the protection of females only. The protection of mankind should also be promoted with that.
- To point out the mistakes of writers and politicians as their words got impact to the millions of the population all over the world.

ANALYSIS:

It is found many times that many false accusations have been made on males and when a writer of a novel promotes that by her statement it will not good for the society as well as mankind. If false accusations have been made on a person, it will not on punish him but his family too. False rape cases in India; In 2014, the Delhi Commission for Women submitted a report stating that 53.2% of rape cases registered between April 2013-July and 2014 in Delhi were false.

In India, the threat of false rape cases on one pretext or the other is increasing since the new amendment to the rape law in 2013. This fact is evident from the study of court judgments and media reports by fast-track courts constituted across the country including Delhi and we have collected some data which will show the results of false accusations on people's life.

Conclusion:

This study tries to distinguish various meanings of feminism which may vary from different- different thoughts of the society. But as the future of the country, we have to clear the real meaning of feminism i.e., the belief that women should have the same rights and opportunities as men but many of the writers and especially female writers and poets twist the real meaning of feminism. The real meaning of feminism is same rights and opportunities by pushing the rights of girls upward not by pulling and vanishing the male's rights. Nowadays, people do not feel about others pain but let's imagine that the false accusation has been made to any male of our family. That will not ruin him only but the full family's reputation, and we can say, it will destroy the whole family. By analyzing all the cases mentioned above, it is suggested to the writers and poets to be very clear about the results of what they are writing as millions of us may follow them and their thoughts.
