# **Quality of Work Life of the Employees of the Popular Retail Stores in Chennai: A Study**

Dr. J. Krithika <sup>a</sup>, P. Pooja <sup>b</sup>

- <sup>a</sup> Senior Assistant Professor, XIME, Chennai
- <sup>b</sup> III year B.Com hons, VITBS, Chennai

#### ABSTRACT

The purpose of this descriptive study is to study the employee's perception on prevailing quality of work life in popular retail stores in Chennai. The sampling design being used here is convenient sampling. The sample size 120 has been considered. This research paper is based on the data collected from both primary and secondary data. Percentage analysis and Chi-Square tests were applied to analyse the data. From this study we could found that the majority of the employee feels that they are satisfied with the existing work environment in the popular retail stores at Chennai.

Key words: Work, environment, employees, life and quality

#### 1. Introduction

In early days human employees were offered only with the fundamental needs like food, shelter and clothing. Later the management gurus F.W.Taylor and Henry Foyal conducted many research work to understand the importance of productivity and the job satisfaction. They could create the awareness on the importance of good working conditions for the employees, which will support to enhance the productivity.

QWL Programs can be evaluated on the basis of fair compensation and job security, Health is wealth, Provide personal and career growth opportunities, Participative management style and recognition, Work-life balance and Fun at workplace. Quality of work life is a multi dimensional aspect. This study covers the satisfaction level of employees towards the prevailing in quality of work life in their organisation. Researchers focused on the major areas such as Compensation, Medical facilities, Basic amenities, Working environment and Career advancement etc.,

#### 2. Review of Literature

| Sirgy et al          | 2002 | Quality of work life measuring instrument was developed by the researchers. It included the major dimensions such as work environment, behaviour of the supervisor and supportive training programs                         | The research findings recommended few major dimensions on needs : Health and safety need Family needs Social needs Esteem and self actualization needs. |
|----------------------|------|---|---|
| Raduan et al         | 2006 | Relationship between career related variables and the work life was studied.  | This work recommended on career fit strategies for the top level management which included needs of both employees and organisation                     |
| Geethika et al       | 2010 | Studied the support of QWL on effective supervisor-<br>employee relationships, reduced stress, increased<br>job security, less grievances, deeper worker<br>responsibility, reduced conflicts and increased<br>productivity | better competence of employees, existing<br>operational climate were found as the<br>major factors enhancing QWL  |
| Steers and<br>Porter | 1983 | They felt QWL as very essential as it is a major supportive instrument for motivating employees.  | Their major finding is - Effective working system with enhanced productivity is possible by an effective QWL  |

| Pranee | 2010 | Major factors to consider for QWL are a.work     |  |
|--------|------|--|--|
|        |      | involvement, b.Intrinsic job motivation,         |  |
|        |      | c.higher order need strength,                    |  |
|        |      | d.perceived intrinsic job characteristics, e.job |  |
|        |      | satisfaction,                                    |  |
|        |      | f.life satisfaction, happiness, and              |  |
|        |      | g.self-rated anxiety.                            |  |

## 3. Research Methodology

Research design.....Descriptive

Data types.....Primary & Secondary

Sample size.....120

Sampling techniques.....Convenient Sampling

Type of data:

Primary data - Collected through using research instrument questionnaire Secondary data - Articles and Journals

Tools for the analysis:

Simple percentage analysis &

Chi-square analysis

## 4. Analysis and Interpretation:

Table 1- Showing the satisfaction of current job

| S. No | Particulars            | Responses | %    |
|-------|------------------------|-----------|------|
| 1     | Very much satisfied    | 20        | 16.7 |
| 2     | Satisfied              | 44        | 36.6 |
| 3     | Neutral                | 48        | 40   |
| 4     | Dissatisfied           | 6         | 5    |
| 5     | Very much Dissatisfied | 2         | 1.7  |
|       |                        | 120       | 100  |

Out of 120 employees only 2 said they are very much satisfied with their current job.

Table 2- showing the job security

| SI. No  | Particulars            | Responses | %    |
|---------|------------------------|-----------|------|
| 51. 110 | r ai ucuiai s          | Responses | /0   |
| 1       | Very much satisfied    | 16        | 13.3 |
| 2       | Satisfied              | 64        | 53.4 |
| 3       | Neutral                | 24        | 20   |
| 4       | Dissatisfied           | 16        | 13.3 |
| 5       | Very much Dissatisfied | 0         | 0    |
|         |                        | 120       | 100  |
|         |                        |           |      |

Majority of the respondents are having their satisfied job security.

#### Table 3- showing the quality of work life

| SI. No | Particulars | Responses | %    |
|--------|-------------|-----------|------|
| 1      | Very good   | 30        | 25   |
| 2      | Good        | 60        | 50   |
| 3      | Neutral     | 20        | 16.6 |
| 4      | Bad         | 10        | 8.4  |
| 5      | Very bad    | 0         | 0    |
| TOTAL  |             | 120       | 100  |

Majority of respondents have opted for "good" as an option in relation to Quality of Wok Life.

Table 4- showing the major issue of qwl

| S.no | Particulars   | Responses | %    |
|------|---------------|-----------|------|
| 1    | Pay           | 16        | 26.6 |
| 2    | Benefits      | 24        | 20   |
| 3    | Job security  | 32        | 13.4 |
| 4    | Job nature    | 26        | 21.6 |
| 5    | All the above | 22        | 18.4 |
|      |               | 120       | 100  |

Majority of the respondents felt the "pay" as a major issue of concern, followed by "job nature".

Table 5- showing the work environment

| SL.No | Particulars     | Responses | %    |
|-------|-----------------|-----------|------|
| 1     | Excellent       | 40        | 33.3 |
| 2     | Good            | 46        | 38   |
| 3     | Neutral         | 26        | 21.7 |
| 4     | Satisfactory    | 4         | 3.3  |
| 5     | Un satisfactory | 4         | 3.3  |
|       |                 | 120       | 100  |

71.3% of the respondents felt positive about their work environment

Table 6- showing the health & safety working conditions

| SI. No | Particulars            | Responses | %    |
|--------|------------------------|-----------|------|
| 1      | Very much satisfied    | 34        | 28.4 |
| 2      | Satisfied              | 60        | 50   |
| 3      | Neutral                | 20        | 16.6 |
| 4      | Dissatisfied           | 6         | 5    |
| 5      | Very much Dissatisfied | 0         | 0    |
|        |                        | 120       | 100  |

 $50\ \%$  of respondents have opted for highly satisfied with the health and safety working conditions.

Table 7- showing the scope of career development

| SI. No | Particulars | Responses | %    |
|--------|-------------|-----------|------|
| 1      | Very high   | 30        | 25   |
| 2      | High        | 46        | 38.3 |
| 3      | Moderate    | 34        | 28.4 |
| 4      | Low         | 6         | 5    |
| 5      | Very low    | 4         | 3.3  |

|  | 120 | 100 |
|--|-----|-----|
|  |     |     |

63.3% of respondents have a very high good opinion with the career development

## Table 8 – Chi Square Test

H0: There is no relationship between the quality of work life and the current job.

H1: There is a relationship between the quality of work life and the current job.

#### Cross tabulation

|  |                     | how is the   | quality of v | vork life in y | our organiz | ation?   |       |
|--|---------------------|--------------|--------------|----------------|-------------|----------|-------|
|  |                     | very<br>good | good         | neutral        | bad         | very bad | Total |
| are you satisfied with your current job? | highly satisfied    | 11           | 7            | 9              | 4           | 6        | 37    |

|                              | 119     |    |                        |

## Table 9 - Analysis using Karl Pearson's correlation

Correlation analysis was applied here to measures the degree of association between two variables.

Null hypothesis (H0): There is positive relationship between the Quality Of Work Life and Major Issue Of QWL.

Alternate hypothesis (H1): There is negative relationship between the Quality Of Work Life and Major Issue Of QWL.

## Correlations

|                 |                     | QUALITY OF<br>WORK LIFE | MAJORE ISSUE<br>OF QWL |
|-----------------|---------------------|-------------------------|------------------------|
| QUALITY OF WORK | Pearson Correlation | 1                       | .874**                 |
| LIFE            | Sig. (2-tailed)     |                         | .000                   |
|                 | N                   | 120                     | 120                    |

| MAJORE ISSUE OF | Pearson Correlation | .874** | 1   |
|-----------------|---------------------|--------|-----|
| QWL             | Sig. (2-tailed)     | .000   |     |
|                 | N                   | 120    | 120 |

<sup>\*\*.</sup> Correlation is significant at the 0.01 level (2-tailed).

$$\mathbf{r} = \frac{N \sum XY - \sum X \sum Y}{\sqrt{N \sum X^2 - (\sum X)^2} \sqrt{N \sum Y^2 - (\sum Y)^2}}$$

r= .874

Inference: Since r is positive, there is positive relationship between the Quality Of Work Life and Major Issue Of QWL

#### 5. Findings:

Majority of respondents are satisfied with the quality of work life, the work environment condition, the healthy and safety working conditions and the career development. These findings shows that the Quality of work life is good among the employees working in popular retail stores at Chennai. As the standard of living and the purchasing power of an average Indian is increasing, they often visit these branded shops. These shop owners are aware about the need of employee retention strategies, as these businesses need a lot of customer interactions, which need an efficient salesman. Hence the quality work life is been taken care by the owners of these retail stores.

#### 6. Conclusion:

QWL can be improved further through various instrumentalities like training and education of employee, support on effective communications ,will lead to improved performance.
