### ABSTRACT

Man has become fearless owing to his scientific successes indeed. Today's mankind is searching for water resources on the Moon & Mars because of scientific temperament as a habitual venture with courage and conviction outweighing lessons of experiences on risks, losses, challenges and failures alike in regard to the saying that failures are stepping stones to success without letting challenges posed by the Nature go scot-free.

Currently, Nuclear Energy Era is running with high energy resources and storages multiplied threatening even peaceful applications when timely precautions are out of place. Damocles' sword is hanging on world-peace with twists and turns within political ideologies on nuclear warfare's know-how by all rivaling factions and involvers let alone the sitting-on-fence and non-involved-neutrals. The latter have no escape route from all-political-weather-penetrating nuclear radiation, yet another intrinsic peril.

That peaceful uses of nuclear energy must have an edge over nuclear weapons is the quiet optimism that has been pronounced ever since the advent of nuclear invention in general. The former can command superiority over the latter as a compulsion of pro-nuclear times all over Continents in particular, if and only if, scientifically necessitated and enforceable social and economic development agenda gets upper hand.

This Paper evinces keen research interest for a Nuclear Energy Project toward Nuclear Tectonic Reshaper (NTR) as joint venture from India's Vedic perspective of Indo-African Proximity on the Vedic-period-Earth to push back tectonic drift re-forming Super Continent once again with technology of nuclear energized tectonic Bulldozers by invention, otherwise called NTR.

**Keywords:** Africa, Drift, India, Man, Mars, Moon, **NTR**, Nuclear, Reshaper

### 1. INTRODUCTION

The continental landmasses drifted in ocean-waters crashing into one another. That phenomenal movement across Vedic-Period-Earth was old continental drift. Present-day six continents were solid-one before the drift. But, drifted African Rock pushed away Indian Rock. Development of Nuclear Energy Systems Knowledge intended for experimental breakthroughs over nuclear energy applications. This suggests nuclear energy applied thought-process development as need of the hour to unify divided Africa and India.

Laymen need to be offered certain amount of specialized knowledge briefly in order to bring them on par with senior-knowers of Africa-India-Super-Continent of Bharatkhande-Jambudvipa-Kushadvipa (BJK) in Perspective and as to why and how it would be feasible through what is to be called the Nuclear Tectonic Re-shaper (**NTR**).

Vedic studiers' Africa-India Vedic corridor's truth-power valuesomeness is already familiar in the cluster of words such as the Bharatkhande-Jambudvipa-Kushadvipa (BJK) reflecting the pre-historic intra-continental Africa-India Proximity on the Vedic-Period-Earth laced through the then land-existences of BJK. Switching over to the English equivalents of BJK, namewise, it turns out India (Bharatkhande-Jambudvipa) and Africa (Kushadvipa), obviously to only two identities. The Jambudeep tells us the full fact of the then one-whole island. It is otherwise known as the Jambudweep which about 22 million years ago had politically and geographically settled this Bharata Khanda (India). In other words, prehistoric intra-continental Africa-India Proximity on the Vedic-Period-Earth is spelt as the BJK of the Vedic Panorama

### 1.1 EVERY RESEARCH HAS THE BEGINNING OF INDEX UNIQUE

## 2. LITERATURE RANGE FOR SURVEY & REVIEW DIMENSIONS

### 2.1. Pal, T. (2012). *Physical Geography during Vedic-Civilization in the Journal of Academic Research in Progressive Education and Development*

➤ **About Veda & Global Geography, the researcher T. Pal has this to say.**

The Geographical Thought of Veda can be seen in Rig Veda. The Earth is divided in two hemispheres and worshipped as the mother Earth for happiness. In Vedic literature, there are different geographical observations made. The rotation of the Earth, the Sun and the day have been analyzed in Veda. Earth was worshipped as Goddess which reflects the environmental deterministic view of Vedic knowledge. Vedic literature glorifies mother earth as the goddess earth by saying the establisher of mass people and shelters. Through the lighting in night, the darkness can be removed is the geographical philosophy found in Veda. Nature has been dealt in different portion of Vedas with geographical explanations. In Veda, earth was taken as something living that can feel the pain when drugged. The earth's origin is dealt with significantly saying that before the earth originated, it was completely water periphery and that water is free from life. So it can tell that Vedic Rishi knew about the earth history in right way.

### 2.2. Bishal Gnyawali (2019) *Review of Vedic Literature from the Perspective of Physical and Human Geography*

Vedas are earliest literature on the Universe meaning knowledge. Veda explains origin of universe and origin of earth. The time of Veda is more than three lakh years before today. It is believed that Veda originated from mouth of Brahma, then moved through hearing and memorizing system. Brahma told Veda to Narada who told Veda Vyasa who codified Veda in graphic form. Veda Vyas had organized and divided the single Veda into four. Fire, wind, water, earth are taken as different forms of god and praised as human to environment interaction. People are discouraged for deforestation which meant not to destroy home of god.

### 2.3. Dr. S.R. Verma (2019) *PHYSICS: An Integral Part of Vedic Wisdom*

➤ **About Spirituality-Spiritualism-Science-Physics-Intellect-Veda, researcher Dr.Verma has this to say.**

All the physical forces of the Universe follow the course of eternal law. The seed of scientific facts lie in Vedas. The Vedas stands for the direct experience of Reality through mind. Vedas uncover the knowledge of total potential of natural laws and human awareness. Vedic seers had an intellectual urge to know how the universe came into existence. Rigveda provides us knowledge of force of gravitation, birth of star and origin of the universe and complete understanding of the origin of the Universe. Recent scientific discoveries seem to validate the concept of Vedas. Physicists and Cosmologists are close to proving that science and Vedas seem to be saying the same thing. Cosmology is very important field for both science and spirituality. In fact, cosmology can be regarded as one of the meeting points between science and spirituality. Agni is meant to convey the oblation offered through it. Fire place to the gods. Agni is used for all form of energy.

#### 2.4. Pal, T. (2012). *Physical Geography during Vedic-Civilization in the Journal of Academic Research in Progressive Education and Development*

➤ **About Veda & God, the researcher T. Pal has this to say.**

The available earliest literature of India has unanimously accepted the four Vedas as revealed to the rishis at the time of the universe. The Vedas are direct utterances of God. The expression Veda means knowledge. No doubt all the Knowledge arises only from God; otherwise, how could the creation have taken place? Creation involves a vast amount of concealed knowledge divulged in the manifestation processes themselves. Knowledge was there which arose as ideas of the Creator. The God reveals his ideas endowing man with the faculty of speech and to inspire him with ideas through his brain and to induce him to the utterances. Such ideas as from the content of the Vedas are revealed only to profound thinkers who had gone through life's experiences and gathered wisdom like certain Munis/Rishis. Before language had developed to such an extent so as to enable one's thoughts and ideas to be translated cogently into speech, the knowledge which remained locked up in man's brain was perfected. Thus man himself was the author of the Vedic revelations directed by God. This truth is borne out by Rig Veda.

#### 2.5. Dr. S.R. Verma (2019) *PHYSICS: An Integral Part of Vedic Wisdom*

➤ **About Research-Consciousness-Global Civilization-Vedic Science of Atom-Light-Water-Fire-Electricity, researcher Dr.Verma has this to say.**

Looking at world civilizations, the Vedas are recognized as the oldest and most ancient scriptures available to mankind. The human consciousness we see today is the result of billions of years of evolution on this planet. The Vedas discuss the evolution of the universe. The existence of a powerful scientific core in the Veda cannot be denied. The term Vedic Science has gained popularity throughout the world in recent decades to indicate the science hidden in the Vedic literature. Words used in the Vedas have multiple meanings, including research, scientific, and spiritual. In the ancient stages of civilization, philosophy, science and culture began to intertwine. In fact, science in Vedic times was not classified according to the same pattern as it is today.

#### 2.6. Dr. S.R. Verma (2019) *PHYSICS: An Integral Part of Vedic Wisdom*

➤ **About Vedic Science of Atom-Sun Light-Water-Fire-Electricity, researcher Dr.Verma has this to say.**

Vedic science is based on the ancient tradition of obtaining knowledge through the study of consciousness. Our great seers, sages and sages dedicated their lives to the truth, turning their bodies into laboratories and conducting experiments on themselves. The seers entrusted all their knowledge and wisdom to the Vedas as the key to deciphering the scientific facts hidden in the Vedic literature. Vedic language is marked by an extreme economy of expression. In ancient times, India occupied an esteemed and elevated position among its contemporaries in the world. Physics and philosophy are complementary. The broad philosophical conception of atomic structure of matter originated in ancient India. Philosophical heritage of India is extremely rich. In ancient India, efforts were made to obtain a rational interpretation of the physical world. Scientific theories are found in the literature of various schools of the Indian philosophy. We find that range of the theories begins with understanding the smallest form of matter in terms of paramanus and it goes up to the dissolution of matter in the Absolute Unity. Ancient thinkers reached a very interesting conclusion that it is the nature of reality to express itself both as unity and diversity. They also affirmed that the Sun is seven kinds of rays and the sun illuminates the moon. Electricity is the powerful seed of Fire God whereas the God of Light and the God of the Sky-Ocean-Water get together heated up and mixed together themselves to complete the composition of flowing water.

---

### 3. RESEARCH & METHODOLOGY & TOOLS

Research well to bring into existence what is not in existence is without peer. This Paper is an opportunity to become thoroughly acquainted with the thoughts of the greatest of our fundamentalist-Scientists who are god-fearing in their self-security view of the physical world's demand and supply of Evolution of knowledge in terms of fundamental advances.

Method-wise, one can at the outset be a dependent on Library of References for collection of snippets relevant to one's choice of the main idea for elaborating it into the size of a Research Material or a Public Domain Paper of research-value-worthiness. Research in a nonprofessional's language is hunt for knowledge. For the educated, Research is scientific and methodical trouble to search for information. Primarily, it's an art of scientific enquiry or disquisition. The term exploration is made up of two words.

➤ **Exploration = Re Hunt: Re means again and again: Search means to find out commodity**

The term exploration is used to collect information about a particular subject. It forms means to chancing out what one doesn't formerly have on record. Hence Research records certain effects or gathered attestations. It promotes movement from the known to the unknown with a literacy bent of mind in letter and spirit. So, Research becomes a systematized literacy for own benefit of store of knowledge. This is information heretofore unknown or a fact one doesn't have. Hence, Research or Research Activity or Research Productivity. For illustration purpose, a Study about 21 Century.

### 3.1 Research Process

Just as there are a wide variety of views as to what exploration consists of and great differences in factual practices as to what people explore and how, so there are indispensable perspectives of what the process of undertaking exploration should look like. One can grasp the intrinsic features of research-exploration such as below.

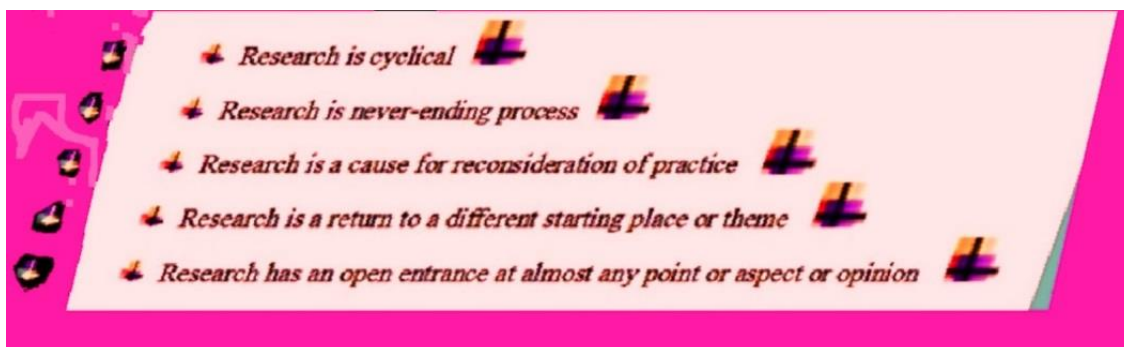

Diagram: Research Intrinsic features

### 3.2 Research Method

Formulation of the research hypothesis is the most important aspect of the research process.

### 3.3 Research Hypothesis

It's a brilliant conjecture about the result of an exploration offer or a vault into the dark! The word thesis is made up of two Greek roots. 'Hypo' means that it's some kind of 'sub-statements', for it's the plausible statement of a proposition. 'Thesis' is about result of a problem which the disquisition seeks to prove in a specific frame of reference.

- One can infer so as that "Hypo Thesis = thesis".

It might be observed that a thesis can arise from particular experience, once records, compliances, expert conversations, artistic values, folk wisdom, suspicion, dreams, the sixth sense, unconsciousness or indeed a coma condition like sleep walking and/ or agony featuring!

A thesis conformation isn't obligatory in every exploration. Still, it should crop as naturally as possible in the dialogues of exploration studies in area studies similar as the Africa Area Studies. Take for illustration-- this Paper's exploration that bank on Africa's geek analysis provoked by Genocide propositions or God's languages.

### 3.4 Research Methodology

It is a way to totally break the exploration problem. In it one studies colorful logical way espoused by an Experimenter. The recrimination is that the entire diapason of logical sweats is wisdom of doing exploration constructively or scientifically. In other words, it not only involves exploration styles but also sense behind the system one uses in the environment of Research. Also, it'll be known as *modus operandi* of a study. Research styles and exploration ways are synonymous expressions used interchangeably within the same compass of exploration and relate to the popular styles the experimenters use. When ways are called logical tools, it implies that that exploration has sole dependence on statistical drudgery-tiles entirely. The below tabulation is easier means of making explicit the scope of method and methodology.

Simplified description of exploration methodology is a way to totally break the exploration problem involving a logical studying with colorful way in addition to knowing exploration system. In other words, this means to say that an experimenter needs to design a methodology for his/ her exploration problem working since all problems aren't one and the same in their individual compass and limitation. Thus, no one dissertation or no one thesis can become the end product of research. Taking cue from the salient feature of uncertainty of Heisenberg's Uncertainty Principle in Quantum World, Research-exploration for a Dissertation or a Thesis is like a moving object for the moving object behaves like a wave with wavelength spread over a region of space, i.e., a Thesis and also like a particle with position localized in space at certain instant of time, i.e., a Dissertation.

4. AFRICA & INDIA FACE OF VEDA-STRUCTURED BJK-EARTH

As a student of Africa Area Studies which is integral-part of the wholesome African Studies, it is noteworthy pre-historical whereabouts of both Africa & India on the face of the Earth, especially as the Earth revolves around itself in general and what is called plate tectonics /continental drift in particular. This not only helps to believe in the existence of the Vedic ancient periods ranging from Epic to Epic in span of time but also facilitates our comprehension of Africans and Indians being one and the same people on a homogeneous land mass. .This is corroborated by the Ramayana, Mahabharata and Bhagavatam being the main clear-cut evidences which have emerged on record to show that Africa & India are situated as one unit called the Supercontinent by name Pangaea, i.e., the landmass that existed about 300 to 200 million years ago. Afterwards, Africa & India are situated still as one unit called the Supercontinent by name Gondwanaland, I.e., the second ancient supercontinent produced by the first split of the Pangaea about another 200 million years ago. Only thereafter, Africa & India began surviving as distinct units of the current times. The diagram below makes clear view of the situational-inset of Africa with India within a super-rocky-land-mould.

Image: Vedic period Pangaea & Gondwanaland masses in unification of Africa with India

Source-Base: Author's thematic contrivance in support of united Africa & India in pre-Vedic age

Source-Base: <Author's thematic contrivance in support of united Africa & India in pre-Vedic age>

Thus, appreciated is the pre-Vedic age's Africa and India amalgamation as seen through the pictures

## 5. VEDA IMPREGNATED EARLY INDO-AFRICAN BJK BONDAGE

Let us now turn to Vedic information such as originally Vedic propagated bondages of Afro-India and/or Indo-African synchronized effects in the following specificity-promoted factual mythological gods, goddesses, divine men & divine women in divine familial Societies.

5.1. Originating in the Himalayas of India, the Saraswati River flowed over 4,500 miles into Africa before emptying into the sea. This is a river mentioned in the Vedas, unique in its geographical depth range of longitude and latitude. The Vedic civilization spread there and was the cradle and center of geological events during the Vedic period. The geographical horizon of the Rig Veda is limited to the Saraswati Valley. A devastating earthquake dried up the river around 1900 BC.

Saraswathi River

The prehistoric, scientific and mythological evidence show that the Saraswati river was not a mystery because the river has been identified as the Saraswati of Rig Vedic times having flowed between 6000 and 4000 BCE after which it dried up due to tectonic shifts of the BJK earth. Hindu mythology accords the Saraswati River enormous significance and regards it as a sacred river. It has a deep connection to the goddess Saraswati (above picture) who is regarded as the personification of wisdom, music, art, and knowledge. The goddess Saraswati, who stands for education, music, and creativity, is linked to the Saraswati River. It is revered as a sacred river and seen as a manifestation of the goddess herself. It is thought that bathing in the Saraswati River will purify the Soul (inner personification) and erase unlawful (anti-law) imbalances of sins. The wellspring of both spiritual and intellectual knowledge is thought to be the Saraswati River's content of sacred waters. It is believed that significant legendary occurrences, including the Mahabharata War and the recital of the Mahabharata, occurred close to the bank of Saraswati River waters. The Saraswati River has a large network of cultural connectivities within the divine and human histories of the pre-historic intra-continental as well as the post-historic inter-continental Africa-India's geo- rich BJK's cultural perceptions and accomplishments thereof. .

5.2. The Arabian Sea did not exist in ancient times and the single continent's elasticity had stretched unabatedly from what is now India to Africa. The ancient name of the African continent was Kushadvipa. It is also mentioned in the Vedic prose of the Bhagavata Purana and the Ramayana. It is appropriate here to make a mention of the non-destructible truth that the Vedic Universe is container of the Vedic Earth besides various Vedic earth-like spheres at once and in lumpsum known to be the Vedic Jambudvipa.

5.3. The connection between the Vedas and Africa dates back to the Ramayan period. In ancient Vedic lore (the Ramayan connection), Africa was known as Kush, Kushadeep, or Kushadvipa. Two reasons for this were that the vast land was covered with tall grasses known as kusha grass (in Sanskrit) and after the war between Rama (god incarnated as a human) and Ravana (King of Lakshus), it eventually came under the command and control of Kush or

Kushha, the eldest son of the victor Rama. So Africans are Kushites. African government textbooks describe Africans as Kushites, which attests to the above information. In addition, the Abyssinian monarch Haile Selassie (pictured below) declared the Africans to be Kushites. Africa was also known as Shankadvipa in ancient times. The Sanskrit word dvipa means an island and Shanka or Shank is Sanskrit for shell. So, the broad in the middle and narrowing-tailed looking island similar in its outline to the shape of a conch shell.

Fig. (1963) Haile Selassie, Emperor of Ethiopia

Source :<<https://www.blackpast.org/global-african-history/speeches-global-african-history/1963-haile-selassie-towards-african-unity/>>

5.4. Another strong Ramayana connection with Africa can be discerned on the island of Mauritius off the east coast of South Africa. The island got its name from "Marichas" which means the island of Marichi who was one of the generals in the army of the demon Ravana and also a name for the sun. However, during the war with Ravana, Rama drove all the demons out of the area and forced Marichi to flee to the demon fort.

Fig. Africa with Mauritius

5.5. Some twenty three million years ago, the singleton island at that time being the one and only one island of its nature known as the Jambudeep by nomenclature implied the Vedic Research related Vedic Jambudvipa, beyond an iota of academic doubtfulness. The same in a second description is the Bharata Khanda. Yet in later times, it became the Vedic Bharatavarsha or Aryavrata in dynastical furtherances made up of particular seven continents of the whole Vedic Earth comprising the Kushadwipa (Africa) or Sankadwipa (Africa) within the limits of Vedic original framework of Universal Vedic Jambudvipa (India/Indian Blackberry Island/ Sudarshana dvipa as identical). Jambudweep has nine varshas also called mixed Asia-Europe Jambudweep with 7 dweepas that make the arena labeling Jambudweep crediting Bharat inclusively.

5.6. There is no doubt that the ancient Vedic timers incorporated many Vedic-puranical names/nomenclature into the geography of the inhabited world of living beings on the Earth (as well as the whole Universe) which still persist in different parts of the world and world's literary traditional treasures, particularly, in Africa such as the Kushadwipa and Ilavrata.

5.7. In Africa, the Kilimanjaro (located in Tanzania) is a triangular mountain. In Hindu cosmology, the devas (gods) and asuras (malicious deities) teamed up to churn the kushila sagara (sea of milk) and extract amrita, the nectar of immortal life. Vasuki, Vishnu's serpent, was used as a stirring cord, and Mount Mandara, one of the four pillars of Mount Meru, was used as a stirring rod. Therefore, Purana names appeared near Mount Mandara, which is identified as Mount Kilimanjaro (Africa). And it certainly is. One of Kilimanjaro's three peaks is known as Mount Shira. Mount Shira is most likely a minor variation of its original name, Kshira (Ocean of Milk) as per the Vedic Cosmos's one of the many non-solid infrastructures.

5.8. Africa has many Indian and Sanskrit names such as Meru, Mandara, Sangama, Sankara, Ganga, Abijata, Kashi, Sagara, Sita and Sala. These names are also easily identifiable on today's maps of Africa.

5.9. Apolitical Dynasties of the Solar Dynasty represent ancestors of Shri Ram (Incarnation as a human being by Vishnu the Almighty) as well as his son and grandson. Rama, his son Kusa (ruled over Africa) and grandson (son of Kusa) Atithi were the 64<sup>th</sup>, 65<sup>th</sup> and 66<sup>th</sup> Rulers respectively in order on the Vedic Earth.

5.10. Africa-India connected prominent apolitical dynasties are as follows.

The Purana and Pali text make it clear the Chola were Kushites from Africa. The Dravidians lived in ancient Africa. It appears that the Tamil belonged to the Nhsj (Nehesy) tribes and, the Telugu and Kannada belonged to the Thnw (Tehenu) tribe. These people were called (Kushites) The Rig Veda provides considerable information on the Kushites of Nubia. The Dravidian speakers belonged to the Kushite Confederation. The term Kushite was a generic term for the tribes that belonged to the Confederation. Tamil is a Dravidian language. The Dravidian people live in South India today. The original Dravidian speakers lived in Africa. They were part of the Middle Africa.

The Chola Dynasty were Telugu-speaking from the Kushadvipa (Africa) or Nubia in the Nile Valley. The Telugu and Egyptian languages share many terms because the Cholas came from Kušadvipa. The southerners' Telugu State (currently Andhra Pradesh & Telangana) in India was Chola. In the Puranas the Chola were also called the Kora/Chora /Qore. The Chola who came to India by land and sea settled on the Coromandel Coast. The royal insignia for the Chola were two snakes. The two snakes as a symbol of royalty goes back to the Kings of Kush. For example, the Telugus (Andhras) managed University known as the Andhra University prominently bears two snakes in the Emblem as seen hereunder signifying the Chola origin. Ancient Telugu continued in India to refer to themselves as the Ikshvaa-Kus also.

Fig. Emblem of Andhra University

Although many Dravidian rulers ruled India, tradition has it that monarchies were concentrated in the Ganges plain where Ethiopians or Kushites intermarried with the native Indians called the Kshtriyas. The Kushite origin of the Kshtriyas is based in the seed of the beginner Ksh, which is equivalent to Kush. The Indian Puranas claim the Kushites ruled the world for 7000 years.

## 6. BJK EARTH'S VEDIC AFRICAN-INDIAN SILHOUETTES

Thus, having to appreciate pre-Vedic age's Africa and India amalgamation, let us now turn to Vedic information such as originally Vedic propagated bondages of Afro-India and/or Indo-African synchronized effects in the following specificity-exhibits with respect to mythological gods, goddesses, divine men & divine women in divine familial Societies such as those under consideration like the pair of divine Sati along with divine Syrandhri, the life-line of this research with reference to their womanhood. The exhibits are self-explanatory.

### 6.1 Exhibit one deemed appropriate in this Research

**Vedic Africa was used to be called**

**Cushadweepa after the name of younger son of God Rama, post-death of Sita's abduction-conductor, Ravana Brahma at the hands of God Rama at rate Ramayana Epic**

**Hence, the Cushitic languages of modern Africans known as Cushites.**

6.2 Exhibit Two deemed appropriate in this Research.

6.3 Exhibit Three deemed appropriate in this Research

6.4 Exhibit Four deemed appropriate in this Research.

God Krishna of Mahabharata & Baghavat Gita is so black skinned as of descent from African lineage while word Krishna implies blackness in the Sanskrit Language known to be mother of all Languages in the World.

### 6.5 Exhibit Five deemed appropriate in this Research

Vedic Bird Crow is Afro-Indianized or Indo-Africanized

The crow is regarded as a sacred bird in the Veda and is the god of justice's chariot. Our ancestors are said to appear as a crow during funeral ceremonies and other rituals performed for the souls who have passed away, accepting our food offerings and bestowing blessings upon us.

<fig.Vedic Crow of Africa & India shown in picture>.

Africans have a belief in crows because, according to African culture, they are not considered to be evil or harbingers of bad news. Actually, it's a decent bird. Additionally, the crow has a white collar rather than being an entirely black bird. The Pariah Crow from Africa is referred to in India as a Crow that is entirely blackish throughout, including the beak. The crow in Africa alerts men to impending perils. Their protector and guide spirit is the crow. Crow was viewed by the Mayans as the messenger of the thunder and lightning god. The bird was regarded by many African tribes as the pinnacle of perfection and the highest form of life. Or, to put it another way, a human soul evolves into a bird at its highest state. One is raised by the Gods to the status of a bird after seven reincarnations on Earth, seven of which were spent as either a person or an animal. In southern India, purely pitch-black-complexioned Crows are called the 'Mala Kaki' arrived from the African Continent, In fact, 'Mala' means a class of human beings who consume the Crows (Kaki) with their body-mass-meat for food in their hunger and so the crow is christened as Mala Kaki. A Mala Kaki or African Crow is also not a household Crow like the native Crow of India.

6.7 The above exhibits deemed appropriate in this Research give rise to an in-depth inspiration to proceed to further heights , i.e., the crux of Hindu Philosophy , that the pre-Vedic and Vedic times' Societies of divine males & females along with the opposing rakshasa's Societies of anti-divine males & females were in co-existence of Fightings-Wars-Compromises conditions under the compulsions of their having been all the creations at the instance of the Divine-Super-Power called the Almighty Ishwar who pre-determinedly seals fate of their Past, Present & Future deeds in life and life-after-death-rebirth cycles.

Now, it becomes needless to make a mention to clarify that the divine pair of Sita and Draupadi of the mythological times occurring in the Vedic Existence of the Earth's Life-cycles such as Pangaea Supercontinent, Gondwanaland Supercontinent, intervening tectonic plate movements, and drifting away of continental land-rock-formations on the surface of Earth's planetary existence, is from the so-called Africanness or Indianness in origin for atheists may still raise doubts and question-tags to demotivate and contradict facts of Vedic timeline However, the aforementioned are the attributes of proclaimed Vedic Indo-African Proximity Perspective

## 7. UPHOLDING BJK IN PERSPECTIVE / INTO PERSPECTIVE / NOT OUT OF PERSPECTIVE

At best, mankind goes on and on in belief of Living Supremacy but gets sized down to a drop of water in the Ocean. Mere mention of Ocean is a pointer enough to universal phenomenon within the Divine's start-ups such as Stars, Oceans & Mountains besides Earth's landscape sailing on spread-sheet of Seafloor, rocky Continents floating on micro-soft-fluid-Mantle, diamond-hard-Planets of macro-size revolving, rotating and swimming around pulling out Earth's core-geology causing Quakes, Tsunami, Plate tectonics, Continental drift, Lava fountains and Solar-Lunar-eclipses. Living Supremacy has been practically a working tool in our hands attracting our mind-set to concentrate on the Science of Divine Firsts & Divine's Start-ups! Mankind struggles to discipline academically studied scientific intelligence across the Universal Laws of Super Vedic Perfection of Divine Wisdom. It has been already famous that Researchers work in cooperation with a respecter of Universal Laws like the Vedic cosmological geography referencers in Research.

- Bharatkhande (India) alone is said to be three times the circumference of the Earth with the Himalayas rose to 80,000 miles in height.
- Jambudvipa doubles (read with the above) on a superhuman scale with demigods, divine beings, Devis , Devatas , Gods and Goddesses inhabiting the heavenly realm headed by God Siva with His heavenly feature according to the Cosmology of the Vedic Geeta-Bhagavatam.
- Detailed geographic features of Jambudvipa with geography of the northern hemisphere combined match part of the Earth leading to saying that Lord Siva is in comparison with Europe as mentioned in a text of the Bhagavatam. That is to infer Europeans are descendants of Lord Siva and hence Siva's soft corner for the Europeans. Look into the picturesque panorama below of vertical dimension in Cosmology. Jambudveepa consisted of modern Asia, Europe, Africa and North America.

- The people of Kusadvipa (Africa) revere the Supreme Personality of Godhead as the fire god Agni. This island is 6,400,000 miles wide. According to the BJP, Africa is the Kushadvipa (Land of Kusha Grass). An ocean of liquid ghee the size of the island itself surrounds Kusadvipa. There are patches of Kusa grass on Kusadvipa, which is where the island gets its name.

Fig. Lord Siva's Heavenly Jambudvipa

Source < Philosophy: The origin of Jambudweepa and Bhartavarsha as per vedic cosmology

<https://vasumathir.blogspot.com/2016/09/the-origin-of-jambudweepa-and.html>

## 8. UNPRECEDENTED SCIENTIFIC HUMAN VIS-À-VIS NATURE'S COSMIC PRECEDENCE

The Vedic Universe passes through repetitive cycles of creation and destruction during which the universal energy gets conserved again and again for the next 311,040,000,000,000 human years, as per Vedic tradition. The Drift of Continents out of the Grip of the Nature's earlier Super Continent was scientifically chased, traced and proved by human scientific power. However, this Paper believes in recurrence of some sort of cosmological eventuality in future bringing about return of Nature's Super Continent through what is called cosmological leveller geo-impact. Since technological understanding of humans about the cosmic Universe and Nuclear Energy has been logically rational compared to that of ancient time, occurrence of a Super Continent is like a contingent liability to human in Nature's actions and inertia. It has already been expounded by Sir Isaac Newton's Classical-Mechanical-Cyclical-Nature's-Law that owing to reasons of owned/direct/indirect forces of an internal and external condition in Earth's scoring core-geology, the Nature's forces act preceded/followed by chain-reactions, resulting in a Super Continent over a cosmological interval, perhaps needed for the Nature, by the Nature and of the Nature in its gathering act of the balancing of unspent forces of energy, actions and inertia consolidated plunging into the act.

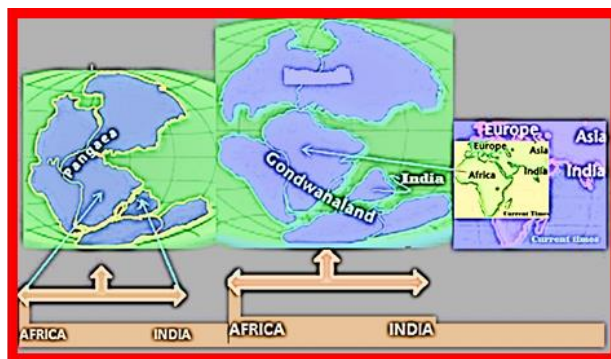

In other words, according to Vedic tradition, the universe goes through recurrent cycles of creation and destruction during which the universe's energy is conserved for the ensuing 311,040,000,000,000 human years. Human scientific power pursued, tracked, and demonstrated the Drift of Continents out of the Grip of the Earlier Super Continent in Nature. However, this paper holds that a cosmological occurrence will recur in the future, bringing about the return of Nature's Super Continent via what is known as a cosmological leveller geo-impact. The emergence of a Super Continent is comparable to a contingent liability to people in Nature's acts and inertia because technological awareness of humans about the cosmic Universe and Nuclear Energy has been logically sensible in comparison to ancient times.

## 9. NTR FOR AFRICA-INDIA-SUPER-CONTINENT

Today's scientific version says that existential split into binary of Laurasia & Gondwanaland happened very-very-firstly and later the current hexarchy of Africa, Asia, North America, South America, Australia & Europe came into existence due to the tricky Nature's divide and rule.

The continents were drifting in the ocean waters and colliding with one another. It was old continental drift that caused the extraordinary displacement throughout Vedic-period-Earth. Before the drift, the current six continents were one solid continent. However, Indian Rock was pushed aside by drifting African Rock. For experimental discoveries regarding nuclear energy applications, the development of nuclear energy systems knowledge is intended. This implies that the application of nuclear energy to thought-process development is urgently needed to unite divided Africa and India. Therefore, Nuclear Tectonic Reshaper (NTR) for Africa-India-Super-Continent of Bharatkhande-Jambudvipa-Kushadvipa (BJK) in Perspective.

Source-Base: <Author's thematic contrivance in support of united Africa & India in pre-Vedic age>

The **NTR** transcends all types of technological barriers to perfect nearness through application of nuclear energy between the African and Indian tectonic plates of Earth's rocky organization. The Nature has blessed almost two-thirds of the human race with understanding ability of some sort. Understanding brought out on the surface of this Paper clearly bonds African and Indian emotions to integrate deep-seated separateness all along through the Nature's drifting forces. Nuclear Energy is like a magical scientific remedy to cure Nature's drifting tendency to keeping ways apart humans inhabiting the Earth's rocks made-up of provisions like dry land and water.

Realistically researched, it can be said that the **NTR** promotes human intimacy against Nature's tricks to divide and rule humans from rock to rock. On the contrary, **NTR** even amalgamates cultural and linguistic barriers which too are some of the Nature's tricks to divide and rule humans from rock to rock. Ultimately, it is clear that the nuclear mind-set for the **NTR** generates two different sub-sets of mind called the performer in a technology-scientist as well as that of populations dwelling on the land masses called the Continents.

## 10. GLOSSARY TO PUT NTR INTO PERSPECTIVE

### ➤ Tectonic Weapon

A tectonic weapon is a theoretical device or system that, by interfering with the Earth's normal geological processes in specific locations to cause seismic occurrences. A tectonic or seismic weapon would involve the utilization of the accumulated tectonic energy of the Earth's deeper layers, according to Aleksey Vsevolodovich Nikolayev (1934 – 2019) corresponding member of the Russian Academy of Sciences. Theoretically, in a region of tectonic activity, the tectonic weapon works by generating a strong charge of elastic energy in the form of a deformed volume of the Earth's crust.

fig. <Aleksey Vsevolodovich Nikolayev (1934 – 2019)>

### ➤ Nuclear Fusion Energy

The solar planet gets its power from a nuclear reaction called nuclear fusion. If it can be simulated on planet Earth where humans live, it will provide infinite and practically the strongest energy force. Research technology and innovative scientific hypotheses in application-based visibility through nuclear fusion are the natural scientific future of humans. The amount of energy produced by nuclear fusion is very large - four times that of fission reactions - and fusion reactions may be the basis of future fusion reactors. Although the massive gravitational force of the sun naturally induces fusion, without that force a higher temperature is needed for the reaction to occur. On Earth, we need temperatures of more than 100 million degrees Celsius and strong pressure.

### ➤ Cosmo genic nuclei

Cosmogenic nuclides are rare nuclides that form in face jewels due to the hail of high-energy cosmic shafts. These cosmic shafts appear from high-energy winner explosions in space. Wherever we're on earth, when we're outdoors, we're constantly bombarded by these cosmic shafts. When high-energy patches flying in space (cosmic shafts) hit the Earth's atmosphere, they beget nuclear responses that produce neutrons called cosmic shaft neutrons. Earth is constantly bombarded by numerous patches from space.

### ➤ Cosmic Energy

Cosmic energy is incredibly important. On a massive scale, it's the order of the macrocosm or source creator energy. At a micro position, it powers unnoticeable tittles into material objects. On a particular position, it's what powers the incarnation of our dreams and intentions into reality.

➤ **Bombardment of Earth**

The Earth is unceasingly bombarded by a variety of patches from external space. When high-energy patches flying in external space (cosmic shafts) impact the Earth's atmosphere, they beget nuclear responses to produce neutrons — called cosmic shaft-convincing neutrons

➤ **Erratic Boulders**

Jewels (Rocks) that have been transported by ice and deposited away are called erratics or erratic boulders.

➤ **Continental Craton**

It's the Bedrock made up of international guard and international platform. On the perimeters of the craton, there may be areas of geologically active bedrock, called orogens, from the Greek word for mountain. In other words, Bedrock has been made up of continental shield and continental platform. On the margins of the craton, there may be areas of geologically active bedrock, called orogens.

➤ **Pronuclear Injections into Animal Nucleus successful**

The transfection done by this fashion involves the microinjection of foreign DNA directly to the manly pronucleus. It's done right after the emulsion of egg and sperm cells when both pronuclei are visible distinctly. This fashion isn't the primary choice for transfection because of its low effectiveness and variable expression pattern. The objectification of foreign DNA can be checked by polymerase chain response or green fluorescent proteins

➤ **Nuclear Fission Energy**

Fission occurs when a neutron slams into a larger snippet, forcing it to excite and resolve into two lower titles — also known as fission products. fresh neutrons are also released that can initiate a chain response. When each snippet splits, a tremendous quantum of energy is released.

---

## 11. CONCLUSION

Alfred Wegener, a German professor, discovered in the 20th century that continents wandered in ocean waters and collided with one another. He claimed that the extraordinary movement over Vedic-Period-Earth was the result of the classic continental drift theory. In 1912, he came to understand that the six continents we know today were once joined into one solid entity called Pangaea, which means "All Nations" in Greek. His 1915 book *Origin of Continents & Oceans*, which included geological and paleontological pictures of drifted America and Africa as well as puzzle-fit observations of their coastal boundaries, demonstrated drifting to the scientific community. According to today's scientific theory, Pangaea underwent a primary divine-cracking existential split into Laurasia and Gondwanaland (LG), and the LG underwent a secondary divine-cracking existential split into a hexarchy of Africa, Asia, North America, South America, Australia, and Europe, ratifying Pangaea, LG, and Drifting Research.

The following four questions should be taken into account for nuclear-thinking NTR.

1. Was Pangaea the divine finality that existed before the creation of humanity?
2. Can the enigma surrounding Pangaea and the Ocean be referred to as the "Pre-nuclear Era"?
3. Why should the limit of the Continents be left to cosmic discretion?
4. Was Pangaea, which was interpreted with the phrase "Before Development of Nuclear Energy Systems Knowledge," intended for the evolutionary humankind's experimental breakthroughs regarding nuclear secrets in subsequent times?

The aforementioned points all abstractly promote the use of nuclear energy to thought-process development as the urgent necessity of the hour to reconcile the opposing camps in pro- and anti-nuclear nations.

Simulated Pangaea is advised by NTR, preferably far in advance. Pro-nuclear World wouldn't be anticipating Pangaea's cosmic return if it were divinely mandated. This implies that the application of nuclear energy to thought-process development is urgently needed to unite divided Africa and India. Therefore, Nuclear Tectonic Reshaper (**NTR**) for Africa-India-Super-Continent of Bharatkhande-Jambudvipa-Kushadvipa (BJK) in Perspective.
