ABSTRACT

Dictionary is for meanings/professional vocabularies knowledge. There is not yet available wholesome Dictionary-product of University Research Papers @ Title-Abstract-Combo for budding scholarly generations of junior-citizen & senior-citizen students.

Any 'Researcher' has to have not only eagle-eye-view but also legal-eye-view to be successful at 'Research'. On the contrary, homely-eye-view at Research does not necessarily beget 'Research'. This Paper has developed canvass idea for faculty-wise University Research Papers consolidation for Title-Abstract-Combo-Dictionary-Product-Planning in public domain of University Research Production.

In African Studies, Dictionary @ Title-Abstract-Combo, when made available, would become innovative research productivity prima facie running into trillions of entries of Research Titles in short communication style vide lovely wide Research Abstracts. Those trillions deserve a place in the 'Research Papers Dictionary' productivisation.

Research-Dictionary-Product-Planning as Himalayan task recalls ancient Greek philosopher, Zeno of Elea who had attempted to solve problem of summing Infinite Series to achieve finite result but rejected it as ever-green impossibility called Zeno's paradox. Later, Aristotle proposed philosophical resolution of Zeno's paradox to which practical shape was given by Archimedes through Archimedes-method of exhaustion that an infinite number of progressive subdivisions could be performed to achieve any finite result. Hence, Archimedes Method applied version to Dictionary-Product-Launching is this Paper's significance.

Following above Archimedean lead, this Paper presents plausible Research Papers Dictionary on the spot in Title-Abstract-Combo @ Author's own African Research Papers forming backbone of title-canvassed A.F.R.I.C.A.N Research Dictionary ideology from the Vedic-period-Earth's Africa-India-Super-Continent of BJK (Bhratkhande-Jambudwipa-Kushadwipa) till pre-colonial-post-colonial-Continental Africa's Resurgence-Relevance-Reliance knowledge-content crafting and indagation series.

Keywords: Abstract, Africa, Dictionary, Planning, Product, Research, Studies, Zeno

2. INTRODUCTION

At the outset, the usage and success of dictionaries is explained as the work compiled to elucidate a language or any other branch of knowledge to that language-speaking people or professionals educated in that branch of knowledge. One may say a dictionary evolves with wide range of information and is a place for information accumulated all along several centuries of legacy. There are many kinds of dictionaries such as dictionaries of words and dictionaries of academic /professional/technical/legal fields of knowledgeable-subjects. Dictionary-reading is a declared good habit for knowledge of words and vocabularies of professional world of Agriculture, Engineering, Technology, Medicine, Mathematics, General Science, Physics, Chemistry, Botany, and Zoology and so on so forth. There are made available Management, Accounting and Internet-linked Dictionary of Sociology knowledge in markets now-a-days.

In view of the above, it may be said that the creation of Research Dictionary of the type of Title-Abstract-Combo-Plan is a tactfully comprehensive task requiring from compiler concerned, disciplined readiness and suitable structured approach. Such a Research Dictionary may be first of its kind on the Globe and presumably, for the first time as a maiden attempt of this Paper. The fast developing international social /scientific/ geo-political/ economic/ diplomatic connections followed by timely contacts besides the processes of globalization and internationalization impacting decision-making and wide expansion of international professional contacts during the 21st century necessitate the involvement of a wide range of professional published Research Papers in the spectrum of research interests. This scenario reminds us that a Research Paper is a professional communication with addition of new knowledge over and above existing knowledge and so becomes the most important instrument. From this angle of viewing, the following definition given by the Western Sydney University (2021) assumes cooperative role.

“Research is defined as the creation of new knowledge and/or the use of existing knowledge in a new and creative way so as to generate new concepts, methodologies and understandings. This could include synthesis and analysis of previous research to the extent that it leads to new and creative outcomes” (Western Sydney University (2021).

In other words, since a research paper is a professional communication on the addition of new knowledge to the existing knowledge and therefore most important and it is necessary to involve a wide range of professional research papers in the spectrum of research interests by ways and means of a Research Dictionary Approach due to the rapidly developing international contacts, the processes of globalization and internationalization and the comprehensive development of international cooperative professional training programs and interactional interface contracts in the 21st century.

For the sake of this Paper, after reading the above inputs, it is important to note here that the working basis of Research Dictionary of published Research Papers is not the words or grammar or interpretations or languages or translations or cultural insights but the Titles & Abstracts of published Research Papers.

3. ZENO’S INFINITE SERIES, ARISTOTLE’S CONFUSION & ARCHIMEDEAN LEAD

The ancient Greek philosopher Zeno of Elea considered the problem of summing an infinite series to achieve a finite result, but rejected it as impossibility (Lindberg, David, 2007). The result was Zeno's paradox. After Zeno's days, there came the Aristotle's proposal with a philosophical resolution of the Zeno's paradox but was apparently left in dark unresolved until taken up by Archimedes. Here, one should notice that there is a change of generations of the mankind from Zeno to Aristotle to Archimedes in the History of the Earth. It was through Archimedes's method of exhaustion that an infinite number of progressive subdivisions could be performed to achieve a finite result (Kline, 1990).

<fig. Archimedes born c. 287 BCE, Syracuse, Sicily [Italy]—died 212/211 BCE, Syracuse>

<fig:Trisome Context Visualization by Author>

What constituted the title theme of A.F.R.I.C.A.N Research Papers Dictionary? The Papers and content-material concerned has come to see light of the day vide the published Papers of mine with effect from the time of Vedic-period-Earth ranging from Vedic-period-Earth's Africa-India-Super-Continent-BJK (Bhratkhande-Jambudwipa-Kushadwipa) up to the times of pre-colonial-post-colonial-Continental Africa's Resurgence-Relevance-Reliance as indagation series in my self-directed research productivity listed in this Paper to count to believe instantaneously. In other words, the pre-historic intra-continental Africa-India proximity series on Vedic-period-Earth in short communication style's lovely wide abstracts of the lonely wide History abstored. It is not going to be an exaggeration to say that the History of the Planet Earth is sounding infinite *ab initio* and/or landing us on the Infinity called History! But, the collective efforts of wisdom of the mankind in a team-spirit confrontation with rational challenges which are like stepping-stones led to successes all the while from generation to generation of the mankind on the Earth .

To sum-up, the Research-Dictionary-Product-Planning as Himalayan task recalls ancient Greek philosopher, Zeno of Elea who had attempted to solve problem of summing an Infinite Series to achieve a finite result but rejected it as ever-green impossibility called Zeno's paradox. Later, Aristotle proposed philosophical resolution of Zeno's paradox to which practical shape was given by Archimedes through Archimedes-method of exhaustion that an infinite number of progressive subdivisions could be performed to achieve any finite result. Hence, the Archimedes Method applied version to Dictionary-Product-Launching is this Paper's significance. Furthermore, it is to be reminded at this juncture and in the same vein, that the working basis of Research Dictionary of published Research Papers is not the words or grammar or interpretations or languages or translations or cultural insights constituting the Infinity of Zeno but only the Title-Abstract-Combo of published Research Papers which obviously stem from the progressive subdivisions called the Archimedean-lead or Archimedes-method of a number of progressive subdivisions yielding finality or finiteness as the only way out of the remote infinity as applied to the trillions of published Papers of Research in African Studies all over the Universities on the Globe during several decades and centuries time. So, the countable finite published Papers of mine makeup the backbone for this Paper's title-canvassed A.F.R.I.C.A.N Research Dictionary.

4. COMPONENTS OF DICTIONARY-MAKING

An idea of resorting to make a Dictionary for common good is notable. When implementing, it is like a brick-by-brick high rise construction activity and the bricks are the components of Dictionary-making.

At the simplest level, there are, for example, four steps to make a Dictionary with the common words we come across and use in our daily experience.

- Step one: Alphabetizing words (organizing the known words)
- Step two: Defining words (ensuring meaning by a sentence)
- Step Three: Editing for correction of silly mistakes made in alphabetizing & meanings
- Step Four: Final & Fair Draft from Rough draft for mini-micro-small-dictionary model

With the above basic skills read and digested, one need not have confusion to start his/her venture of Dictionary-Product-Launching in African Studies @ Title-Abstract-Combo-Plan with whatever number of published Papers collected on hand , if not trillion .

The following Chart displays to highlight the necessary and essential components of Dictionary.

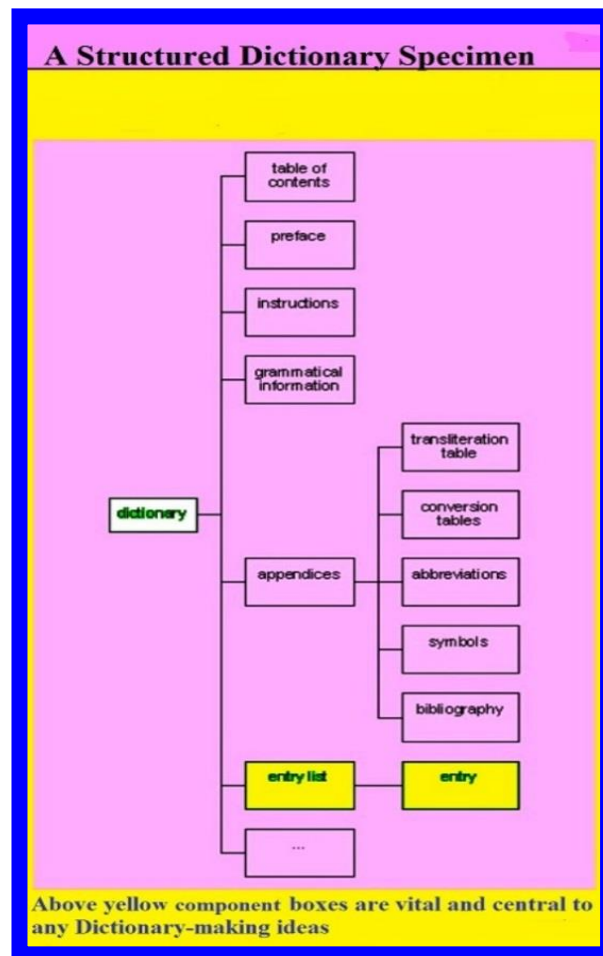

chart: <https://www.christianlehmann.eu/ling/ling_meth/ling_description/lexicography/index.html?>

Keeping in mind that this Paper's endeavor is Dictionary-Product-Launching in African Studies @ Title-Abstract-Combo-Plan for published Research Papers in general (with single/co-authorship) and the sample of Papers selected for the purpose of this Paper is from this Author's own published papers (with single authorship and without second Author), the above Chart is the source of guidance to understand the components in a structured Dictionary.

The Chart with its components is self-explanatory and detailed/descriptive narration/discussion on all the components inclusively is out of the scope of this Paper except the two yellowish-appearing boxes, namely, *the entry list* box leading to *the entry* box.

These two boxes as components are said to be vital and central in Dictionary-making process and serve the immediate interests of this Paper (Author's own published papers with single authorship considered) to arrive at finality in a finite sense without botheration of the infinite trillions of Research Papers in existence elsewhere for which right now there is no need for 'Brainstorm' since it involves time-consumption.

4.1 Entry List & Entries of Dictionary of Research Papers @ Title-Abstract Combo

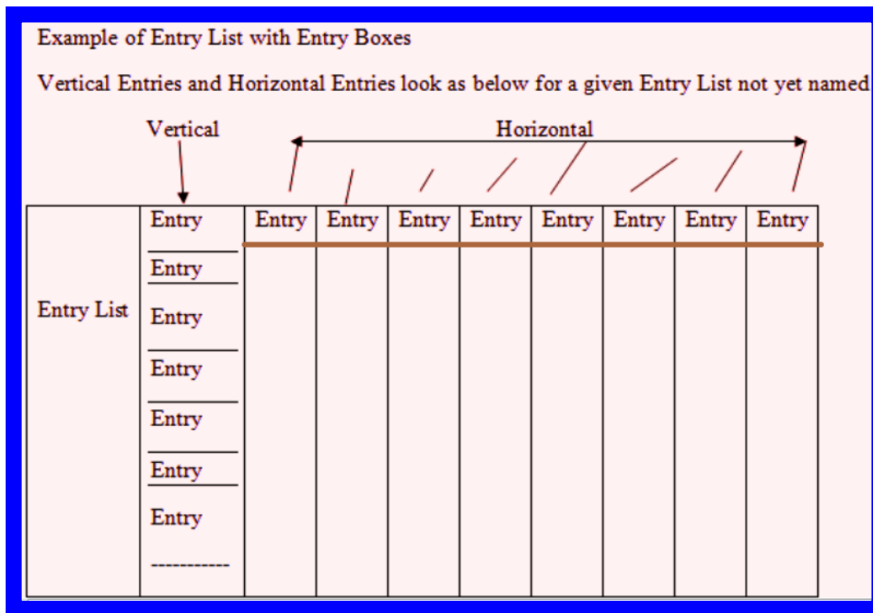

As per the English Grammar, List denotes a series of names, items, or figures arranged in a row or rows. For example, a list of groceries, a list of names, a list of items and a list of figures. Generalizing the groceries, names, items and figures, one calls all of them commonly by what is called an entry or entries. Hence an entry list came into vogue. Sometimes, an entry list is made at random with entries considered for the sake of making entry list including all available entries. At other times, an entry list insists on orderly arrangement for itself such as alphabetical or chronological, to give more sense and meaning for itself. For example, a Library Catalog is such an entry list.

Coming to the objective of this Paper's Dictionary-Product for African Research Papers @ Title-Abstract Combo, the Entry List is made up of this Author's all published Research Papers in African Studies as entries which are arranged alphabetically with a flavor of traditional Dictionaries of Words input alphabetically.

Thus, the Entry List of alphabetical Entries of this Author's all published Research Papers is as presented below which is vital and central to dictionary-making called A.F.R.I.C.A.N Research Papers Dictionary conceived in the Title of this Paper .

4.2 Entry List with Vertical & Horizontal Entry Boxes Arrays

Arrays of Vertical and Horizontal Entries in respective boxes for an unnamed Entry List look as seen below.

5. ALPHABETICAL & VERTICAL ENTRY INPUT'S LISTED PROVISIONAL ENTRY LIST

One can observe hereunder the anatomy of alphabetically categorized Research Papers input on the left-hand-side facing the set of individual entry(s) of Research Paper(s) on the right-hand-side for general and thematic illustrational understanding. And, the importance of structured informational organization in a world of trillions of Research Papers published on various subdivisions of Universal Knowledge for centuries together crosses our mind-set. All word-dictionaries are such products and hence, the similar and more of such value applies also to a Research Papers Dictionary.

Entry List A for Paper Titles beginning with Alphabet A	First Entry

	Second Entry

	Third Entry

	Etc .
Entry List B for Paper Titles beginning with Alphabet B	First Entry

	Second Entry

	Third Entry

	Etc
Entry List C for Paper Titles beginning with Alphabet C	First Entry

	Second Entry

	Third Entry

	Etc.,
Entry List D for Paper Titles beginning with Alphabet D	First Entry

	Second Entry

	Third Entry

	Etc.,

In the above table, one can see separate alphabetical entry lists designated as A, B, C, D, etc., each carrying three entries, for illustration sake. That is to understand that there are a total of twelve entries ($4 \times 3 = 12$) without assigning serial numbers. One can allot serial numbers also during preparation of the provisional listing as in our case-study of published Research Papers @ Title-Abstract-Combo of single authorship of this Author. Care to be taken for not faulting with the manner of alphabetical order in which the individual entries are input.

Research Papers Entry List Alphabets A to Z - Entries Alphabetical Titles	1. Title

10. Title	
Abstract	

6. FINAL-SINGLE-CONSOLIDATED ALPHABETICAL ENTRY LIST FROM (5) ABOVE

At the time of preparing a single and final entry list consolidated for all the four lists of A, B, C, D of twelve entries in the order in which they appear from (4) above, it is automatic that they stand in the alphabetical order since their entry-level alphabetical order is already ensured and taken care of without scope for deviation. Serial numbering can also be introduced in the single and final entry list of entries for it is a Dictionary for Research papers, may be in trillions and yet countable but not like the innumerable words in a Word-Dictionary without numbering custom applied to single-word-entries.

As this Paper's consideration of single-authorship Research Papers of this Author for Dictionary-Product-Launching in African Studies @ Title-Abstract-Combo-Plan, only the alphabetical order is the due emphasis but not the other like the chronological order. Both of the alphabetical order and chronological order at the same time in one unified appearance /manifestation is a permanent impossibility, say, like the aforementioned Zeno's Paradox without finality. The solution is obtained by viewing them organized separated from each other or seen in different contextual divisions for unique information / data and consequential grasp.

7. A.F.R.I.C.A.N RESEARCH PAPERS MODEL DICTIONARY @ TITLE-ABSTRACT-COMBO-PLAN

It is better informed to one and all concerned at this stage that due to space constraints for a publishable Research Paper like the present one, the Author has to observe certain limitation in practice keeping in mind that only space of 8.00MB is the permissible limit as per Author Guidelines.

That is to say that the space provided for the Full Abstract @ the TITLE-ABSTRACT-COMBO- Plan, is constrained since any Abstract at the minimum is as heavy as not less than 250 words as per the guidelines given to Authors by this Journal of IJRPR (International Journal of Research Publication and Reviews) . Therefore, it is decided by the Author to omit for the time being the vast (250 words) portions of Abstracts in the tabulation @ the TITLE-ABSTRACT-COMBO- Plan, just below and indicate only the single word 'Abstract' beneath the Title entry . After all, that this is only a Research Paper going to be published @ the TITLE-ABSTRACT-COMBO- Plan but not the actual Dictionary outright either for marketable print-copies or for the bookshops / markets virtually.

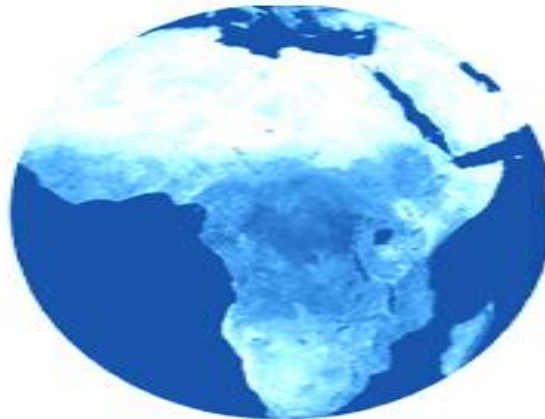

It is worth mentioning that the sample of 31 Research Papers of this Author are considered for the making the Entry List with 31 Entries alphabetically accommodated in vivid colorations under each alphabet from A to Z. An alphabet may be missing if there is no Research Paper Title beginning with that specific alphabet.

In all, the 31 Titles with respective alphabets command the following weightages as seen in the tabulation. Accordingly, the Title-entries can be seen and read hereunder.

Entry List of 31 Entries

Alphabet	Titles published		
A	9	M	2
B	0	N	1

9. CONCLUSION

The A.F.R.I.C.A.N Research Papers' Dictionary-Product-Launching in African Studies @ Title-Abstract-Combo-Plan is the need of the hour for all aspiring and upcoming research specialists in India and abroad to following the rising Continental Independent Africa's knowledge-content crafting and researched series pre- & post-colonialism in short communication style vide lovely wide abstracts vide lonely wide World-history with the justification of 'Science & Scientific Multi-disciplinarians' being familiar parametric epithets that one attaches to applaud and it is so public too in the post-colonial bygone era to saturate oneself with Science's walkabout-talk-about as the just void between the Human Reality and the Ultimate Reality .

The Research Papers Dictionary by way of the Short Communication Style, otherwise called the amazing Short Messaging Service (SMS) as Research's acclimatization to pure Title-Abstract-orientation is a pragmatic way out of the remote infinity called Research and to keep oneself abreast with research as affinity .
