ABSTRACT

Semisolid Dosage Form That Are Generally Applied Topically On Skin Are Called As The Cream

The Main Aim Of This Research Work Is To Prepare Herbal Cream With Anti Blemishes A And

Antioxidants Properties Using Herbal Extracts. Herbal Products Are Largely Prepared In Recent Time.

Herbal Cream Offers Several Advantages Over Synthetic Creams. Herbal Creams Does Not Have Any

Side Effects Without Any Side Effects It Gives Fairness Look To The Prepare Herbal Cream Was Very

Simple Prepared Formulation Was Evaluated For Various Formulation Was Evaluated For Various

Parameters Like Colour Appearance Consistency Viscosity Stability Studies And Customer Acceptance Cream May Be Considered As A Pharmaceutical Products And Cosmetics Used To Treat Various Skin Conditions. Natural Constituents Are Chosen For Preparation And Evaluation Of Cream.

That Choose Constituents Have A Particular Use To Improve Our Skin. Aloe Vera And Cucumber Peel

They Are Medicinal Plants They Used From Traditional Method Cosmetic And Some Medicinal Products

Are Prepared From. Natural Products

Introduction

In Pharmaceutical Industry There Are Many Drug Delivery Systems

That Are Used To Ensure That Delivery Of Drug To The Specific Part Of Body Many Parameters Are

Considered While Selecting Drug Delivery Systems For Cream Topical Drug Delivery Systems Is Most

Suitable. The Public Paying More Attention In Herbal Formulations Due To Their Superior Quality And Few Adverse Effects

It Gives Essential Nutrients To Skin. So That The Effectiveness Of Skin Increase And Also Improved The Skin Becomes Healthy And Glowing

The Cosmetic Word Is Derived From Greek Word Kosmetikos Which Means: To Adorn

The Cosmetic Has Growing Value In The World Specially Women So

That It Is Very Good And Important And Helpful To People

Advantages Of Herbal Face Cream

Ingredients Used In Herbal Face Cream

Aloe Vera :

Family: Asphodelaceae

Kingdom: Plantae

Application: Laxative

Heartburn

Skin Condition

Wound Healing

Sandalwood

Kingdom: Plantae

Family: Santalaceae

Application:

Cooling Effect

Anti-Aging

Skin Condition

Tulsi :

Kingdom: Plantae

Family: Lamiaceae

Application: Antitussive

Anti-Inflammatory To Treat Infection

Turmeric :

Family: Zingiberaceae

Application: Disinfectant

Skin Condition To Treat Cough

Neem

Family: Malaceae

Kingdom: Plantae

Application: Antimicrobial

Antiseptic

Control Blood Sugar Level

Honey :

Application:

Sweetner Flavouring Agent

Antidepressants

Anti Anixit

Ideal Characteristics Of Cream

A Cream Should Have Uniform Colour And Apperance

A Cream Should Have Smooth Texture After Application A Cream Should Have Texture Between 6 And 7 Which Is

Compatibility With Skin Ph A Cream Should Not Be Grasy And Should Not Stain

A Cream Should Not Dehydrated The Skin

A Cream Should Not Irritate The Skin

We Can Easily Spread The Cream On Our Skin Easily Creams Should Be Viscous
